Dear Public Health Supporter:

We are pleased to present the Turning Point Model State Public Health Act. This product is the result of a three-year effort by the Turning Point Public Health Statute Modernization Collaborative to develop a tool for state, local and tribal governments to use in improving their public health statutes and administrative rules.

Public health has existed as a fundamental public service carried out by governments in the United States for more than 200 years. Public health laws have long been considered an essential tool of public health practice, defining the responsibilities of individuals and the duties of government to act for the health of society.

Many existing state public health codes were built in layers during the 20th century in response to specific diseases or health threats. Due to varying diseases and other health threats that may affect population groups and to changes in health systems, government structures, and other laws, public health laws in many jurisdictions are outdated. These laws may be ineffective in responding to contemporary health threats.

Although experts have recommended statutory reform to improve the public health system since the 1980s, a straightforward model has not been available. The Public Health Statute Modernization Collaborative was formed in April 2000 to address this need. Funded by the Robert Wood Johnson Foundation as part of its Turning Point Initiative to strengthen the public health system in the United States, the Collaborative is a multi-disciplinary group comprised of representatives from five states and nine national organizations and government agencies, assisted by experts in specialty areas of public health. The Alaska Division of Public Health is responsible for coordinating the Collaborative. Individual representatives to the group and the consultants who assisted in the development of this product are listed in the introductory material accompanying the Act.

The Collaborative does not advocate that the Model State Public Health Act presents a mandate to states, nor that it be "swallowed whole." The Model State Public Health Act is intended as a means for state, local and tribal governments to assess their existing public health laws and identify the changes they deem necessary. The Act strives to address modern conditions which impact public health; incorporate modern scientific developments in the areas of disease control and epidemiology; equip public health officials with a range of flexible powers needed to control infectious diseases and other conditions; define relationships among public health agencies and other partners in the public health system; and comport with current legal standards of privacy, due process, and risk assessment.

The emergence of new health threats during the time the Collaborative was involved in this project have made the need for modern, flexible public health laws even more apparent. We hope the Turning Point Model State Public Health Act proves to be a useful tool for improving the ability of the public health system to carry out its responsibilities.

Sincerely,

Patricia Nault, MPA

Alaska Division of Public Health

Acknowledgments

Although we can't list them all, the Turning Point Public Health Statute Modernization Collaborative gratefully acknowledges all of the individuals who contributed to the development of the Turning Point Model State Public Health Act (TPMSPHA) since this process began in April 2000. It has been heartening to discover throughout this process the willingness of innumerable people from diverse backgrounds both inside and outside the field of public health to listen, question, teach, learn, and offer their time, their skills and their insights to this effort.

The Collaborative benefited greatly from the comments about the Turning Point Model State Public Health Act offered by individuals and organizations across the country. We want to express our appreciation to all who responded to our request for review and comments earlier this year.

The Collaborative's ability to reach all of the individuals and groups interested in improving public health laws was significantly enhanced by the following organizations who carried our message to their membership. We thank them for their contribution to this effort:

American Public Health Association

Association of Public Health Laboratories

Association of State and Territorial Health Officials

National Association of Attorneys General

National Association of County and City Health Officials

National Association of Local Boards of Health

National Conference of State Legislatures

National Governors Association

The Turning Point Model State Public Health Act

A Tool for Assessing Public Health Laws

Presented by

The Turning Point Public Health Statute Modernization Collaborative

www.hss.state.ak.us/dph/improving/turningpoint/nav.htm

Introduction

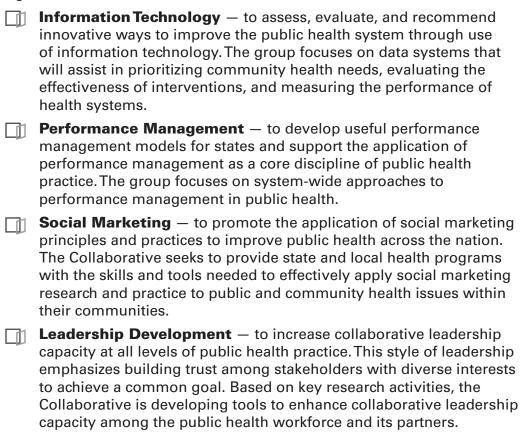

Development of the Turning Point Model State Public Health Act

This Model State Public Health Act is a product of the Public Health Statute Modernization Collaborative, part of the Turning Point Initiative begun in 1997 and funded by the Robert Wood Johnson Foundation. The purpose of Turning Point is to transform and strengthen the public health system in the United States to make the system more effective, more community-based, and more collaborative.

Formed in April 2000, the Turning Point Public Health Statute Modernization Collaborative is a partnership comprised of representatives from five states and nine national organizations and government agencies. The goal of this group is to develop a Model State Public Health Act and related tools to assist state and local governments to assess their existing public health laws and update laws to effectively address a range of modern public health issues. The authors of the Act work under contract to the Collaborative.

The Turning Point Public Health Statute Modernization Collaborative is one of five National Excellence Collaboratives that focus on strengthening specific aspects of the nation's public health system. The other Collaboratives and their goals include:

Why a Model Public Health Law?

The need for public health statute reform was cited by the Institute of Medicine (IOM) (part of the National Academy of Sciences chartered by the U.S. Congress) in its 1988 report on the future of public health. The report found that state public health laws are in many cases seriously outdated and recommended that states review their public health statutes and make revisions necessary to (1) clearly delineate the basic authority and responsibility entrusted to public health entities and (2) support a set of modern disease control measures that address contemporary health problems and threats.

In its November 2002 report, The Future of the Public's Health in the 21st Century, the IOM noted again that "public health law at the federal, state and local levels is often outdated and internally inconsistent." The IOM recommended that DHHS appoint a national commission to provide guidance to states in reforming their laws to meet modern scientific and legal standards. The report specifically references the Turning Point Model State Public Health Act as a primary resource.

Availability of Legal Information about the Turning Point Model State Public Health Act

Inquiries seeking substantive information on or interpretations of the Act (e.g., how its provisions comport with constitutional norms or the meaning of specific legal language) can be directed to:

Prefatory Notes

The Turning Point Public Health Statute Modernization National Collaborative is a partnership comprised of representatives from five states, nine national organizations and government agencies, and experts in specialty areas of public health. Funded by the Robert Wood Johnson Foundation, the Collaborative's mission is to transform and strengthen the legal framework for the <u>public health system</u> through a collaborative process to develop a model state public health law.

Through intensive research and consensus building among national, tribal, state, and local public health representatives, the Turning Point Model State Public Health Act (hereinafter "Act") presents a comprehensive, model state law that sets forth statutory language on public health administration and practice for consideration by existing <u>public health agencies</u> at the state and local levels.

The <u>Act</u>'s provisions reflect modern constitutional, statutory, and case-based law at the national and state levels, as well as current scientific and ethical principles underlying modern public health practice. It presents a template and checklist of issues for public health law reform. As such, the <u>Act</u> does not represent a mandate to states considering public health law reform, nor are its provisions intended to be adopted without adaptation or edition in any state.

The <u>Act</u> is divided into nine (9) Articles with various Sections [see Table of Contents on page 9]. Consistent with recent findings from the Institute of Medicine (IOM) in *The Future of the Public's Health in the Twenty-First Century* (2002), the <u>Act</u> adopts a systematic approach to the implementation of public health responsibilities and authorities. It focuses on the organization and provision of <u>essential public health services and functions</u> based on their definition in *Public Health in America*.¹

The <u>Act</u> presents a broad mission for <u>state</u> and <u>local public health agencies</u> to be carried out in collaboration with various public and private entities within the <u>public health system</u>. Much of the substance of the <u>Act</u> concerns traditional powers of <u>state</u> or <u>local public health agencies</u> (*e.g.*, <u>contagious disease</u> control, <u>nuisance</u> abatement, and inspections). These powers are articulated within a framework of modern jurisprudence and public health science that balances the protection of the public's health with respect for the rights of <u>individuals</u> and groups. For a summary of the scope of the <u>Act</u>, please see the discussion of its organizational content below.

Though comprehensive, the scope of the Act is limited in the following ways:

- The Act does not cover some distinct areas of law despite their strong public health relevance. For example, laws relating to mental health, alcohol and substance abuse, health care services or health insurance (whether through Medicare or Medicaid programs, or other federal, state, tribal, or private programs) are not specifically addressed. Correspondingly, the Act does not include model provisions for all existing laws that impact the public's health (e.g., seat belt provisions, DUI laws, and tobacco control regulations) or for specific program areas within public health.
- The Collaborative further recognizes environmental health services as core public health functions that have broad applications throughout public health practice. Given time and resource constraints, however, environmental health is not thoroughly addressed in the Act.
- The <u>Act</u> does not include extensive language concerning areas of the law that are traditionally covered elsewhere in state statutes (*e.g.*, tax provisions, administrative procedures, disabilities protections).

Please Note - Defined terms are <u>underlined</u> except in Article, Section, or subsection titles.

¹ See Public Health Functions Steering Committee, USPHS Office of Disease Prevention and Health Promotion, Public Health in America (1994) [available at www.health.gov/phfunctions/public.htm].

- As a model statutory law, the <u>Act</u> does not specify the regulations needed to implement statutes, which can be important in public health practice. Regulations are left to the discretion of executive agencies through the promulgation of administrative rules authorized by the <u>Act</u>.
- The <u>Act</u> is intended for consideration and potential adoption in the states based on existing administrative and organizational structures within the state. It does not attempt to design a model public health department or present an ideal state/local organizational structure (although some structural options, like the creation of a public health advisory council² or public health districts, are presented for consideration). Variations in the structure and organization of state and local <u>public health systems</u> preclude a model statutory format that would uniformly apply across the United States.³

The organizational content of the <u>Act</u> is briefly summarized below. Please see the text of the <u>Act</u> itself for precise language.

ARTICLE I, PURPOSES AND DEFINITIONS, sets forth legislative findings and purposes, as well as definitions that shape the scope and context of the <u>Act</u>.

The definition of "condition(s) of public health importance" (a disease, syndrome, symptom, injury, or other threat to health that is identifiable on an individual or community level and can reasonably be expected to lead to adverse health effects in the community) extends the scope of the <u>Act</u> beyond disease-specific classifications featured in many existing state public health codes.

The definition of "essential public health services and functions" (as defined in § 2-102) mirrors principles from *Public Health in America*, and is the basis for the mission of state or local public health agencies and the public health system. State or local public health agencies are defined as any organization operated by the state (or local government) that principally acts to protect or preserve the public's health. States considering adopting portions of the Act may specifically name these state or local agencies according to their existing legislative titles.

The <u>Act</u> vests state or local public health agencies with a series of powers and the responsibility to accomplish the mission of "<u>public health</u>" (to assure the conditions in which the population can be healthy). As IOM noted in its recent report (referenced above), accomplishing the mission of <u>public health</u> is not solely the responsibility of <u>state</u> or <u>local public health agencies</u>. Rather, IOM emphasizes the continued development of an intersectoral <u>public health system</u>. The <u>Act</u> correspondingly adopts principles for widespread collaboration among public and private sectors within the "<u>public health</u> system," which is broadly defined to include:

"<u>public sector partners</u>"— international, federal, tribal, or other state or local governments and their <u>public health agencies</u> that provide <u>essential public health services and functions</u> or work to improve public health outcomes with a state or local public health agency; and

"<u>private sector partners</u>"— non-governmental <u>persons</u>, including community organizations, <u>contractors</u>, educational institutions, <u>health care facilities</u>, <u>health care providers</u>, <u>health insurers</u>, private businesses, media, nonprofit organizations, and <u>volunteers</u>, that provide <u>essential public health services and functions</u> or work to improve public health outcomes in collaboration with a <u>state</u> or <u>local public health agency</u>.

ARTICLE II, MISSION AND FUNCTIONS, clarifies the mission of <u>public health</u>, thus framing the scope and structure of the <u>Act</u>. Unlike many state public health statutory codes, the <u>Act</u> prescribes

Please Note - Defined terms are <u>underlined</u> except in Article, Section, or subsection titles.

² The role of the "public health advisory council" within the Act is limited to providing guidance and assistance to the state public health agency in the development of a comprehensive public health plan in § 3-107. The Collaborative notes the existence in many states of public health advisory councils or boards of health that have may many additional functions.

³ For more information on existing state and local public health systems, *see* Lawrence O. Gostin, Public Health Law: Power, Duty, Restraint (University of California Press and Milbank Memorial Fund, 2000); Lawrence O. Gostin and James G. Hodge, Jr., *State Public Health Law: An Assessment* (2002) available at: www.hss.state.ak.us/dph/improving/turningpoint/publications.htm.

policy of the state to protect the public's health in collaboration with the <u>public health system</u> while also respecting individual rights to bodily integrity, privacy, nondiscrimination, and other legally-protected interests. Article II ties the mission of <u>public health</u> to <u>essential public health services and functions</u>, states generally the powers of <u>state</u> or <u>local public health agencies</u>, and promotes collaboration among various entities within the <u>public health system</u>.

ARTICLE III, PUBLIC HEALTH INFRASTRUCTURE, concerns the "<u>public health</u> <u>infrastructure</u>," defined as the competencies and resources that enable <u>public health agencies</u>, in collaboration with other components of the public health system, to provide essential public health services and functions throughout the state. Sections within Article III assert the need to develop a strong infrastructure, which requires the coordinated efforts of <u>state</u> or <u>local public health agencies</u> and others within the <u>public health system</u> to:

- Identify and provide leadership for the provision of <u>essential public health services and functions</u>;
- Develop and support an information infrastructure that supports <u>essential public health services</u> and functions;
- Develop and provide certification, credentialing, or effective training for members of the <u>public</u> health workforce;
- Develop performance management standards for the <u>public health system</u> that are tied to improvements in public health outcomes or other measures;
- Consider participation in voluntary accreditation programs for <u>state</u> or <u>local public health</u> <u>agencies</u>;
- Provide incentives for and evaluation of workforce development efforts, performance management, and accreditation standards; and
- Comprehensively plan and set priorities for the accomplishment of <u>essential public health</u> services and functions.

ARTICLE IV, COLLABORATION AND RELATIONSHIPS WITH PUBLIC AND PRIVATE SECTOR PARTNERS, builds further on the concepts of Articles II and III by addressing relationships among <u>public</u> and <u>private sector partners</u> within the <u>public health system</u>. Ongoing relationships among these various entities are facilitated and encouraged through formal agreements, public health districts or partnerships, <u>privatization</u> of some services or functions, and tools for improving communication and collaboration. Specific provisions authorize the use of inter-state, intra-local, and inter-tribal agreements between <u>tribal</u>, <u>state</u>, and <u>local public health agencies</u>. As well, various options to ensure coordination in the provision of <u>essential public health services and functions</u> among participants in the <u>health care system</u> (*e.g.*, <u>health care facilities</u> and <u>providers</u>, and <u>health insurers</u>) are stated.

ARTICLE V, PUBLIC HEALTH AUTHORITIES/POWERS, provides model language on some core powers and authorities of <u>state</u> and <u>local public health agencies</u> to prevent and control <u>conditions</u> <u>of public health importance</u>. These powers include: surveillance activities; reporting; epidemiologic investigation; notification and referral services (*e.g.*, partner notification); <u>testing</u>, <u>examination</u>, and <u>screening</u>; medical treatment; <u>quarantine</u> and <u>isolation</u>; <u>vaccination</u>; <u>licenses</u>; abating public health <u>nuisances</u>; and administrative searches and inspections. Please refer to the corresponding Sections related to these powers and authorities (*see* Table of Contents on page 9) for specific language and context.

The exercise of these powers/authorities is framed under a series of guiding principles in § 5-101[b]. These principles include:

Public health purpose. The exercise of any public health authority or power should measurably
further or support improving or sustaining the public's health by accomplishing <u>essential public</u>
health services and functions.

- Scientifically-sound practices. Whenever possible, a <u>state</u> or <u>local public health agency</u> shall exercise its authorities or powers through procedures, practices, or programs that are based on modern, scientifically-sound principles and evidence.
- Well-targeted intervention. A <u>state</u> or <u>local public health agency</u> shall strive to design and implement interventions that are well-targeted to accomplishing <u>essential public health services</u> <u>and functions</u>. An agency shall try to avoid using compulsory power in a manner that is overbroad (applying to more individuals than is necessary for the public's health).
- Least restrictive alternative. A <u>state</u> or <u>local public health agency</u> shall employ the least restrictive alternative in the exercise of its authorities or powers, especially compulsory powers.
- **Nondiscrimination.** State and <u>local public health agencies</u> shall not discriminate in an unlawful manner against individuals on the basis of their race, ethnicity, nationality, religious beliefs, sex, sexual orientation, or disability status.
- Respect for dignity. State and <u>local public health agencies</u> shall respect the dignity of each <u>individual</u> under their jurisdiction, regardless of his/her nationality, citizenship, or residency status; and
- Community involvement. Protecting the public's health requires ongoing public health education and outreach to encourage, facilitate, and promote community participation in accomplishing public health goals.

Though the principles support an ethic of voluntarism in public health practice, the <u>Act</u> authorizes the use of compulsory powers as well, and provides for potential criminal and other sanctions against those whose actions may pose a danger to the public's health.

ARTICLE VI, PUBLIC HEALTH EMERGENCIES, is based on the Model State Emergency Health Powers Act (MSEHPA). The MSEHPA was drafted by the *Center for Law and the Public's Health* following the terrorist events of September 11, 2001 and subsequent anthrax exposures in several states. It presents a series of provisions for preparing for and responding to serious <u>public health</u> <u>emergencies</u> based on recommendations from national <u>bioterrorism</u> law and policy experts, existing state laws, and other input.⁵

The provisions of the MSEHPA have been altered or adapted to the framework, scope, and specifics of this larger, comprehensive model public health act. Correspondingly, substantial reorganization and substantive editions have been made to reflect the structure and intent of the larger model act.

Like Article VI, ARTICLE VII, PUBLIC HEALTH INFORMATION PRIVACY, is also based on the provisions of an existing model law. The Model State Public Health Privacy Act⁶ was originally drafted in 1999 by Professors Lawrence O. Gostin and James G. Hodge, Jr. under the auspices of the Centers for Disease Control and Prevention and in collaboration with a national expert committee comprising public health officials, civil libertarians, and community representatives. It presents a "gold standard" for the responsible <u>acquisition</u>, <u>use</u>, <u>disclosure</u>, and <u>storage</u> of identifiable health information by <u>state</u> and <u>local public health agencies</u>.⁷

⁴ Available at www.publichealthlaw.net/Resources/Modellaws.htm

⁵ For more information, *see* Gostin, LO, Sapsin, J, Teret, SP, Burris, S, Mair, JS, Hodge, JG, Vernick, J. The Model State Emergency Health Powers Act: Planning and Response to Bioterrorism and Naturally Occurring Infectious Diseases. <u>Journal of the American Medical Association</u> 2002; 288: 622-688; Gostin, LO, Hodge, JG. <u>The Model State Emergency Health Powers Act Commentary</u>. Seattle: Turning Point Statute Modernization Committee, 2002; 1-42.

⁶ Available at www.publichealthlaw.net/Resources/Modellaws.htm.

⁷ For more information, *see* Gostin, LO, Hodge, JG, Valdiserri RO. Informational privacy and the public's health: the model state public health privacy act. <u>American Journal of Public Health</u> 2001; 91:1388-1392.

The provisions of ARTICLE VII are consistent with the Privacy Rule promulgated by the federal Department of Health and Human Services pursuant to the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The Privacy Rule specifically exempts public health authorities from its broad coverage, thus allowing states to determine their own statutory and other legal protections concerning the privacy of public health information.

Various Sections of the model privacy act are incorporated into this larger <u>Act</u>. Since many state laws do not comprehensively address privacy protections for public health information, the privacy provisions in ARTICLE VII provide specific requirements of <u>state</u> and <u>local public health agencies</u>.

ARTICLE VIII, ADMINISTRATIVE PROCEDURES, CIVIL AND CRIMINAL

ENFORCEMENT, AND IMMUNITIES, contains key Sections on various administrative matters that apply throughout the <u>Act</u>. For example, unless otherwise stated within each Section, provisions in Article VIII authorizing administrative rulemaking by the <u>state public health agency</u>, setting forth procedural due process requirements, and suggesting criminal and civil remedies for violations apply to all applicable Sections of the <u>Act</u>. The general immunity of state and local governmental entities from civil actions absent gross negligence or willful misconduct is proclaimed in § 8-107.

ARTICLE IX contains MISCELLANEOUS PROVISIONS, including (1) the short title of the Act (the Turning Point Model State Public Health Act) and clarification that titles and subtitles of Articles, Sections, and subsections are instructive, but not binding; (2) a uniformity of the law provision; (3) a severability clause; (4) a clause for repeals of existing state law; (5) a provision concerning unintended conflicts of federal and existing state laws; (6) an effective date of the Act; and (7) a requirement for reports to be generated and issued to the State legislature concerning the potential impact on state or local public health agencies if passed.

The provisions of the <u>Act</u> were developed after reviewing hundreds of existing state statutory and regulatory provisions. Although prior draft copies of the <u>Act</u> acknowledged some of these laws that were used directly in drafting specific sections, multiple editions to the existing language in this final version of the <u>Act</u> preclude an accurate listing of legislative sources.

Table of Contents

ARTICLE I. PURPOSES AND DEFINITIONS

Section

- 1-101. Legislative Purposes
- 1-102. Definitions

ARTICLE II. MISSION AND FUNCTIONS

<u>Section</u>

- 2-101. Mission Statement
- 2-102. Essential Public Health Services and Functions
- 2-103. Roles and Responsibilities
- 2-104. Public Health Powers In General

ARTICLE III. PUBLIC HEALTH INFRASTRUCTURE

Section

- 3-101. Public Health Infrastructure
- 3-102. Public Health Workforce
- 3-103. Performance Management
- 3-104. Accreditation of State or Local Public Health Agencies
- 3-105. Incentives and Evaluations
- 3-106. Public Health Planning and Priority Setting
- 3-107. Public Health Advisory Council

ARTICLE IV. COLLABORATION AND RELATIONSHIPS WITH PUBLIC AND PRIVATE SECTOR PARTNERS

Section

- 4-101. Relationships Among Federal, Tribal, State, or Local Public Health Agencies
- 4-102. Relationships Among Public and Private Sector Partners
- 4-103. Relationships Among Participants in the Health Care System

ARTICLE V. PUBLIC HEALTH AUTHORITIES/POWERS

Section

- 5-101. Prevention and Control of Conditions of Public Health Importance
- 5-102. Surveillance Activities Sources of Information
- 5-103. Reporting
- 5-104. Epidemiologic Investigation
- 5-105. Counseling and Referral Services for Persons Exposed to Contagious Diseases
- 5-106. Testing, Examination, and Screening
- 5-107. Compulsory Medical Treatment
- 5-108. Quarantine and Isolation
- 5-109. Vaccination
- 5-110. Licenses
- 5-111. Public Health Nuisances
- 5-112. Administrative Searches and Inspections

ARTICLE VI. PUBLIC HEALTH EMERGENCIES

Section

- 6-101. Planning for a Public Health Emergency
- 6-102. Declaring a State of Public Health Emergency
- 6-103. Management of Property
- 6-104. Protection of Individuals
- 6-105. Private Liability
- 6-106. Compensation

ARTICLE VII. PUBLIC HEALTH INFORMATION PRIVACY

Section

- 7-101. Acquisition of Identifiable Health Information
- 7-102. Use of Identifiable Health Information
- 7-103. Disclosure of Identifiable Health Information
- 7-104. Security Safeguards
- 7-105. Fair Information Practices

ARTICLE VIII. ADMINISTRATIVE PROCEDURES, CIVIL AND CRIMINAL ENFORCEMENT, AND IMMUNITIES

Section

- 8-101. Administrative Rulemaking
- 8-102. Applicability of State Administrative Procedure Act
- 8-103. Procedural Due Process
- 8-104. Criminal Penalties
- 8-105. Civil Remedies
- 8-106. Civil Enforcement
- 8-107. Immunities

ARTICLE IX. MISCELLANEOUS PROVISIONS

Section

- 9-101. Titles
- 9-102. Uniformity Provision
- 9-103. Severability
- 9-104. Repeals
- 9-105. Conflicting Laws
- 9-106. Reports and Effective Date

ARTICLE I PURPOSES AND DEFINITIONS

Section 1-101. Legislative Purposes

The [State legislature] states that the purposes of this Act are to:

- (1) Identify and strengthen the <u>public health infrastructure</u> to improve the public's health through statutory reform;
- (2) Set a broad mission for providing <u>essential public health services and functions</u> principally through the efforts of <u>state</u> and <u>local public health agencies</u> in collaboration with others in the <u>public health system</u>;
- (3) Identify roles and responsibilities of <u>state</u> or <u>local public health agencies</u> to provide <u>essential public health services and functions</u> through various governmental powers while also respecting individual rights;
 - (4) Select and provide leadership for the provision of <u>essential public health services and functions</u>;
- (5) Craft performance management standards for the <u>public health system</u> that are tied to improvements in public health outcomes or other measures;
- (6) Develop and provide effective training and credentialing for members of the <u>public health</u> workforce:
- (7) Comprehensively plan and set priorities for improving and sustaining the public's health through the performance of <u>essential public health services and functions</u> using ongoing, inclusive, and systematic planning processes;
- (8) Promote and build strong relationships among <u>state</u> or <u>local public health agencies</u> and their <u>public</u> and <u>private sector partners</u> within the <u>public health system</u>;
- (9) Promote cooperation and formal collaborative agreements between the state and <u>tribes</u>, <u>tribal organizations</u>, and the Indian Health Service regarding public health planning, priority setting, information and data sharing, reporting, resource allocation, funding, service delivery, jurisdiction, full faith and credit and comity of state and tribal <u>court</u> orders issued in this [*State*], and other matters addressed in this Act;
- (10) Create scientifically- and legally-sound and effective powers of <u>state</u> and <u>local public health</u> <u>agencies</u> for the prevention and control of <u>conditions of public health importance</u> at the individual and community levels that are consistent with guiding principles authorizing the responsible use of power and respect for individual rights;
- (11) Respond to potential <u>public health emergencies</u> through formal declarations and triggering of special public health powers during an emergency;
- (12) Address privacy and security issues arising from the <u>acquisition</u>, <u>use</u>, <u>disclosure</u>, and <u>storage</u> of identifiable health information by state and local public health agencies;
- (13) Implement administrative rulemaking authority by the <u>state</u> or <u>local public health agency</u> and set affirmative procedures for protecting due process;
- (14) Provide fair and appropriate criminal and civil penalties for violations of the provisions of this Act, as well as declare immunities of specific actors where justified; and
- (15) Require regular reporting and accountability for <u>state</u> and <u>local public health agencies</u> in the state.

Section 1-102. Definitions

As used in this Act, these terms shall be defined as follows:

- (1) "<u>Acquire</u>," "<u>Acquired</u>," or "<u>Acquisition</u>" means, within Article VII, to collect or gain possession or control of <u>identifiable health information</u> for <u>public health</u> purposes.
 - (2) "Act" means the Turning Point Model State Public Health Act.
- (3) "<u>Amend</u>" means, within Article VII, to indicate one or more disputed entries in <u>identifiable</u> <u>health information</u> and to change the entry without obliterating the original information.
- (4) "<u>Bioterrorism</u>" means the intentional use of any microorganism, virus, infectious substance, or biological product that may be engineered as a result of biotechnology, or any naturally occurring or bioengineered component of any such microorganism, virus, infectious substance, or biological product, to cause death, disease, or other biological malfunction in a human, an animal, a plant, or another living organism.

(5) "Chain of custody" means:

- [a] the tracking of <u>specimens</u> or <u>samples</u> for the purpose of maintaining control from initial collection to final disposition;
- [b] being accountable at each stage of collecting, handling, <u>testing</u>, <u>storing</u>, and transporting of the specimens or samples; and
- [c] reporting <u>test</u> results concerning the <u>specimens</u> or <u>samples</u>.
- (6) "<u>Condition of public health importance</u>" means a disease, syndrome, symptom, injury, or other threat to health that is identifiable on an individual or community level and can reasonably be expected to lead to adverse health effects in the community.
- (7) "<u>Confidentiality statement</u>" means a written statement dated and signed by an applicable <u>individual</u> which certifies the <u>individual</u>'s agreement to abide by the privacy and security policy of a <u>state</u> or <u>local public health agency</u>, as well as this <u>Act</u>.
- (8) "<u>Contact</u>" means an <u>individual</u> who has been identified as having been exposed, or potentially been exposed, to a contagious or possibly <u>contagious disease</u> through another <u>individual</u> or nonhuman source with the <u>contagious</u> or possibly <u>contagious disease</u>.
- (9) "Contagious disease" means an <u>infectious disease</u> that can be transmitted from <u>individual</u> to <u>individual</u>.
- (10) "<u>Contaminated material</u>" means wastes or other materials exposed to or tainted by chemical, radiological, or biological substances or agents.
- (11) "<u>Contractor</u>" means any non-governmental <u>person</u> who provides services or functions to or on behalf of a <u>state</u> or <u>local public health agency</u> pursuant to a contract or other agreement.
- (12) "<u>Counseling and referral services</u>" or "<u>CRS</u>" means outreach activities for finding contacts to inform them of their possible exposure to <u>contagious disease</u> and provide counseling, testing, and referral services to prevent the further spread of disease.
- (13) "Court" means any State or local court of competent jurisdiction under the laws of the [State], as well as tribal courts (where appropriate under existing laws).
- (14) "<u>Decontaminate</u>," "<u>Decontaminated</u>," or "<u>Decontamination</u>" means to remove or neutralize chemical, radiological, or biological substances or residues from <u>individuals</u>, buildings, objects, or areas.
- (15) "<u>Disclosed</u>," "<u>Disclosed</u>," or "<u>Disclosure</u>" means, within Article VII, to release, transfer, disseminate, provide access to, or otherwise communicate or divulge all or any part of <u>identifiable health information</u> to any <u>person</u>, other than a <u>state</u> or <u>local public health agency</u> or authorized <u>public health</u> official.

- (16) "<u>Disease outbreak</u>" means the sudden and rapid increase in the number of cases of a disease or other <u>condition of public health importance</u> in a population.
- (17) "<u>Epidemic</u>" means the occurrence in a community or region of a group of similar <u>conditions</u> of <u>public health importance</u> that are in excess of normal expectancy and derived from a common or propagated source.
- (18) "Essential public health services and functions" mean those services and functions as defined in § 2-102 of the Act.
- (19) "<u>Expunged</u>," "<u>Expunged</u>," or "<u>Expunging</u>" means, within Article VII, to permanently destroy, delete, or make non-identifiable.
- (20) "Health care facility" means any non-federal or non-tribal institution, building, or agency or portion thereof, whether public or private (for-profit or nonprofit) that is used, operated, or designed to provide health services, medical treatment, or nursing, rehabilitative, or preventive care to any individual. This includes, but is not limited to: ambulatory surgical facilities, community health centers, home health agencies, hospices, hospitals, infirmaries, intermediate care facilities, long term care facilities, medical assistance facilities, mental health centers, outpatient facilities, public health centers, rehabilitation facilities, residential treatment facilities, skilled nursing facilities, and adult day care centers. This also includes, but is not limited to, the following when used for or in connection with the foregoing: laboratories; research facilities; pharmacies; laundry facilities; health personnel training and lodging facilities; patient, guest, and health personnel food service facilities; and offices and office buildings for persons engaged in health care professions or services.
- (21) "<u>Health care provider</u>" means any <u>person</u> that provides health care services including, but not limited to, hospitals, medical clinics and offices, special care facilities, medical laboratories, physicians, pharmacists, dentists, physician assistants, registered and licensed practical/vocational nurses, paramedics, emergency medical or laboratory technicians, community health workers, and ambulance and emergency medical workers.
- (22) "<u>Health insurer</u>" means an entity subject to the insurance laws and regulations of this [*State*], or subject to the jurisdiction of the [*State insurance commissioner*], that contracts or offers to contract to provide, deliver, arrange for, pay for, or reimburse any of the costs of health care services. This may include a sickness and accident insurance company, a health maintenance organization (HMO), a nonprofit hospital and health service corporation, or any other entity providing a plan of health insurance or health benefits.
- (23) "Health oversight agency" means a governmental agency, or <u>person</u> acting under a grant of authority or contract with such agency, that is authorized by law to oversee entities within the health care system (public or private) to determine eligibility or compliance with legal standards; investigate claims of fraud regarding health care, health services or equipment; or conduct related activities.
- (24) "<u>Identifiable health information</u>" means any information, whether oral, written, electronic, visual, pictorial, physical, or any other form, that relates to an <u>individual's</u> past, present, or future physical or mental health status, condition, treatment, service, products purchased, or provision of care, and
 - [a] reveals the identity of the individual whose health care is the subject of the information; or
 - [b] there is a reasonable basis to believe the information could be utilized (either alone or with other information that is, or should reasonably be known to be, available to predictable recipients of such information) to reveal the identity of that <u>individual</u>.
 - (25) "Individual" means a natural human being.
- (26) "<u>Infectious disease</u>" means a disease caused by a living organism or other pathogen, including a fungus, bacteria, parasite, protozoan, or virus. An <u>infectious disease</u> may be transmissible from <u>individual</u>, animal to <u>individual</u>, or insect to <u>individual</u>.

(27) "Infectious waste" means:

- [a] "biological waste," including blood and blood products, excretions, exudates, secretions, suctioning and other body fluids, and waste materials saturated with blood or body fluids;
- [b] "cultures and stocks," including etiologic agents and associated biologicals; specimen cultures and dishes and devices used to transfer, inoculate, and mix cultures; wastes from production of biologicals and serums; and discarded live and attenuated vaccines;
- [c] "pathological waste," including biopsy materials and all human tissues; anatomical parts that emanate from surgery, obstetrical procedures, necropsy or autopsy and laboratory procedures; and animal carcasses exposed to pathogens in research and the bedding and other waste from such animals, but does not include teeth or formaldehyde (or other preservative agents); and
- [d] "sharps," including needles, I.V. tubing with needles attached, scalpel blades, lancets, breakable glass tubes, and syringes that have been removed from their original sterile containers.
- (28) "<u>Institutional review board</u>" means any board (including a privacy board), committee, or other group formally designated by an institution or authorized under federal or state law to review, approve the initiation of, or conduct periodic review of research programs to assure the protection of the rights and welfare of human research subjects, including privacy rights.
- (29) "<u>Inter-tribal organization</u>" means an entity the majority of whose members are representatives of <u>tribes</u> and <u>tribal organizations</u>.
- (30) "<u>Isolated</u>," or "<u>Isolation</u>" means the physical separation and confinement of an <u>individual</u> or groups of <u>individuals</u> who are infected or reasonably believed to be infected with a <u>contagious</u> or possibly <u>contagious disease</u> from non-isolated <u>individuals</u>, to prevent or limit the transmission of the disease to non-isolated <u>individuals</u>.
- (31) "<u>Legal representative</u>" means the parents, court-appointed legal guardians, or other <u>individual(s)</u> lawfully authorized to make health care decisions for a minor or <u>individual</u> who lacks the capacity to act on his or her own behalf.
- (32) "<u>License</u>," "<u>Licensed</u>," or "<u>Licensure</u>" means, within Article V, an authorization that conditionally allows the recipient to conduct, for a specified period of time, activities that would be unlawful without the authorization.
- (33) "Local public health agency" means any organization operated by a local government in the state (including local public health boards, agencies, commissions, or offices) that principally acts to protect or preserve the public's health.
- (34) "<u>Mental health support personnel</u>" means any <u>person</u> authorized or trained to provide mental health support to <u>individuals</u>, including psychiatrists, psychologists, social workers, and volunteer crisis counselors or groups.
- (35) "Non-identifiable health information" means any information, whether oral, written, electronic, visual, pictorial, physical, or any other form; that:
 - [a] relates to an <u>individual's</u> past, present, or future physical or mental health status, condition, treatment, service, products purchased, or provision of care; and
 - [b] does not reveal the identity of the <u>individual</u> whose health status is the subject of the information; or
 - [c] there is no reasonable basis to believe such information could be utilized (either alone or with other information that is, or should reasonably be, known to be available to predictable recipients of such information) to reveal the identity of that <u>individual</u>.

- (36) "<u>Nuisance</u>" means a condition, act, or failure to act that unreasonably interferes with the health or safety of the community by endangering life, generating or spreading <u>infectious diseases</u>, or otherwise injuriously affecting the public's health.
- (37) "Organized militia" means any military force organized under state laws including the State National Guard, the Army National Guard, or the air national guard.
- (38) "<u>Person</u>" means an <u>individual</u>, corporation (for-profit or nonprofit), estate, trust, partnership, limited liability company, association, institution, joint venture, governmental body, <u>tribe</u> or <u>tribal</u> <u>organization</u>, or any other legal or commercial entity.
- (39) "<u>Predictive value</u>" ("PV") means the ability of a <u>test</u> or <u>exam</u> to accurately predict the presence or absence of a <u>condition of public health importance</u> in a population. The PV is determined by the <u>test's</u> validity (*i.e.*, sensitivity and specificity), reliability, and the prevalence of the condition in the population.
- (40) "<u>Private sector partner</u>" means non-governmental <u>persons</u>, including community organizations, <u>contractors</u>, educational institutions, <u>health care facilities</u>, <u>health care providers</u>, <u>health insurers</u>, private businesses, media, nonprofit organizations, and <u>volunteers</u> that provide <u>essential public health services and functions</u> or work to improve public health outcomes in collaboration with a <u>state</u> or <u>local public health agency</u>.
- (41) "<u>Privatization</u>" means those techniques or activities that promote involvement of the private sector, <u>tribes</u>, and <u>tribal organizations</u> in providing <u>essential public health services and functions</u> that have traditionally been provided by <u>state</u> or <u>local public health agencies</u>.
- (42) "<u>Public health</u>" means assuring the conditions in which the population can be healthy. This includes population-based or individual efforts primarily aimed at the prevention of injury, disease, or premature mortality, or the promotion of health in the community, such as assessing the health needs and status of the community through public health surveillance and epidemiological research, developing public health policy, and responding to public health needs and emergencies.
- (43) "<u>Public health agency</u>" means any organization operated by federal, <u>tribal</u>, state, or local government that principally acts to protect or preserve the public's health.
- (44) "<u>Public health agent</u>" means any official (including a <u>public health official</u>) or employee of a <u>state</u> or <u>local public health agency</u> who is authorized to carry out provisions of this <u>Act</u>.
- (45) "<u>Public health emergency</u>" means an occurrence or imminent threat of an illness or health condition that:
 - [a] is believed to be caused by any of the following: (i) <u>bioterrorism</u>; (ii) the appearance of a novel or previously controlled or eradicated infectious agent or biological <u>toxin</u>; or (iii) a natural disaster, a chemical attack or accidental release, or a nuclear attack or accident; and
 - [b] poses a high probability of any of the following harms: (i) a large number of deaths in the affected population; (ii) a large number of serious or long-term disabilities in the affected population; or (iii) widespread exposure to an infectious or toxic agent that poses a significant risk of substantial future harm to a large number of people in the affected population.
- (46) "<u>Public health infrastructure</u>" means the competencies and resources that enable <u>public health agencies</u>, in collaboration with other components of the <u>public health system</u>, to provide <u>essential public health services and functions</u> throughout the state.
- (47) "<u>Public health official</u>" means the head officer or official of a <u>state</u> or <u>local public health</u> <u>agency</u> who is responsible for the operation of the agency and has the authority to manage and supervise the agency's activities.
- (48) "<u>Public health system</u>" means <u>state</u> and <u>local public health agencies</u> and their <u>public</u> and <u>private sector partners</u>.

- (49) "<u>Public health workforce</u>" means state and local <u>public health agents</u> and other <u>persons</u> working within the <u>public health system</u>, to provide <u>essential public health services and functions</u> in the state.
- (50) "<u>Public information</u>" means information that is generally open to inspection or review by the public.
- (51) "<u>Public safety authority</u>" means a primary public safety entity, department, division, bureau, or agency of state, local, or tribal governments that act principally to protect or preserve the public safety; or any <u>person</u> directly authorized to act on behalf of a public safety agency.
- (52) "<u>Public sector partner</u>" means international, federal, tribal, or other state or local governments and their <u>public health agencies</u> that provide <u>essential public health services and functions</u> or work to improve public health outcomes with a state or local public health agency.
- (53) "Quarantine" means the physical separation and confinement of an <u>individual</u> or groups of <u>individuals</u>, who are or may have been exposed to a <u>contagious</u> or possibly <u>contagious disease</u> and who do not show signs or symptoms of a <u>contagious disease</u>, from non-<u>quarantined individuals</u>, to prevent or limit the transmission of the disease to non-<u>quarantined individuals</u>.
- (54) "<u>Sample</u>" means a substance derived from a nonhuman source and collected for the purposes of analysis.
- (55) "<u>Screen,</u>" "<u>Screened</u>," or "<u>Screening</u>" means the systematic application of a <u>test</u> or <u>exam</u> to a defined population.
- (56) "<u>Specimen</u>" means blood, sputum, urine, stool, or other bodily fluids, wastes, tissues, and cultures necessary to perform required tests.
- (57) "<u>State public health agency</u>" means any organization operated by the state (including the state board, department, division, or office of <u>public health</u>) that principally acts to protect or preserve the public's health.
- (58) "<u>Store</u>," "<u>Stored</u>," or "<u>Storage</u>" means, within Article VII, to hold, maintain, keep, or retain all or any part of <u>identifiable health information</u>.
- (59) "<u>Test</u>," "<u>exam</u>," "<u>testing</u>," or "<u>examination</u>" means any diagnostic or investigative analyses or medical procedures that determine the presence or absence of, or <u>exposure</u> to, a <u>condition of public health</u> importance, or its precursor, in an individual.
- (60) "<u>Toxic</u>" or "<u>Toxin</u>" means a chemical, radiological, or biological agent that causes disease or some alteration of the normal structure and function of an <u>individual</u> or animal.
- (61) "<u>Transmissible agent</u>" means a biological substance capable of causing disease or infection through <u>individual</u> to <u>individual</u>, animal to <u>individual</u>, or other modes of transmission.
- (62) "<u>Tribe</u>" means the same as the term "Indian tribe" in 25 U.S.C. § 450b(e), section 4(e) of the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638, as amended.
- (63) "<u>Tribal organization</u>" means the same as the identical term in 25 U.S.C. § 450b(*l*), section 4(*l*) of the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638, as amended.
- (64) "<u>Tribal public health agency</u>" means any program or organization operated by a <u>tribe</u> or <u>tribal organization</u> (including boards, agencies, commissions, or offices) that principally acts to protect or preserve the public's health. This includes health programs of any <u>tribal organization</u> that carries out <u>essential public health services and functions</u> or otherwise acts to protect or preserve the public's health.
- (65) "<u>Use</u>" or "<u>Used</u>" means, within Article VII, to employ or utilize all or any part of <u>identifiable</u> <u>health information</u> for a public health purpose.

- (66) "<u>Vaccinate</u>," "<u>Vaccinated</u>," <u>Vaccination</u>," or "<u>Vaccine</u>" means a suspension of attenuated or noninfectious microorganisms or derivative antigens administered to stimulate antibody production or cellular immunity against a pathogen for the purpose of preventing, ameliorating, or treating an <u>infectious disease</u>.
- (67) "<u>Volunteer</u>" means any authorized <u>person</u> who provides services or functions to or on behalf of a <u>state</u> or <u>local public health agency</u> on a voluntary, unpaid basis. The provision of meal allowances or reimbursements for travel or other incidental costs by the agency to a volunteer does not constitute payment.

ARTICLE II MISSION AND FUNCTIONS

Section 2-101. Mission Statement

- [a] It is the policy of this [*State*] that the health of the public be protected and promoted to the greatest extent possible through the <u>public health system</u> while respecting individual rights to dignity, health information privacy, nondiscrimination, due process, and other legally-protected interests.
- [b] The mission of <u>state</u> and <u>local public health agencies</u> is to provide leadership and protect and promote the public's health by:
 - (1) Assuring the conditions in which people can be healthy;
 - (2) Providing or assuring the provision of <u>essential public health services and functions</u> (as defined in § 2-102) that are culturally and linguistically appropriate for the populations being served;
 - (3) Encouraging collaboration among <u>public</u> and <u>private sector partners</u> in the <u>public health</u> <u>system</u>; and
 - (4) Seeking adequate funding and other sources to provide <u>essential public health services and functions</u> or accomplish public health goals through public or private sources.

This Act shall not be construed to require an <u>individual</u> or agency within the <u>public health system</u> to provide specific health services or to mandate <u>state</u> and <u>local public health agencies</u> to implement unfunded programs.

Section 2-102. Essential Public Health Services and Functions

For the purposes of this Act, "essential public health services and functions" mean services and functions to:

- [a] Monitor health status to identify and solve community health problems;
- [b] Investigate and diagnose health problems and health hazards in the community;
- [c] Inform, educate, and empower individuals people about health issues;
- [d] Mobilize public and private sector collaboration and action to identify and solve health problems;
- [e] Develop policies, and plans, and programs that support individual and community health efforts;
- [f] Enforce laws and regulations that protect health and ensure safety;
- [g] Link <u>individuals</u> to needed personal health services and assure the provision of health care when otherwise unavailable;
 - [h] Assure a competent public health workforce;
- [i] Evaluate effectiveness, accessibility, and quality of personal and population-based health services; and
 - [j] Research for new insights and innovative solutions to health problems.

2-103. Roles and Responsibilities

- [a] In General. State and <u>local governments</u> are responsible for assuring that the <u>public health</u> system accomplishes the mission of <u>public health</u>.
- [b] **Collaboration.** While certain public health functions must be performed by <u>state</u> and <u>local public health agencies</u>, these agencies may also actively collaborate with <u>public</u> and <u>private sector partners</u> within the <u>public health system</u>. The provision of <u>essential public health services and functions</u> are shared goals of the <u>public health system</u> to achieve the mission of <u>public health</u>.

- [c] **Individual Rights.** All persons within the <u>public health system</u> shall seek to accomplish the mission of <u>public health</u> while respecting individual rights including:
 - (1) Respect for the dignity of each individual;
 - (2) Protection of health information privacy for each <u>individual</u> consistent with Article VII of this <u>Act</u> and any applicable federal, state, or local laws;
 - (3) Provision of adequate due process as required by this <u>Act</u> or other applicable federal, tribal, state, or local laws; and
 - (4) Avoidance of explicit or implicit discrimination in an unlawful manner of <u>individuals</u> on the basis of their race, ethnicity, nationality, religious beliefs, sex, sexual orientation, or disability status.

2-104. Public Health Powers - In General

To carry out the mission of <u>public health</u>, <u>state</u> and <u>local public health agencies</u> are authorized to provide or implement <u>essential public health services</u> and <u>functions</u>, including services or functions to:

- [a] Utilize a broad range of flexible powers to protect and promote the public's health, including compulsory or mandatory powers as defined in the <u>Act</u>;
- [b] Provide public health information programs or messages to the public that promote healthy behaviors or lifestyles, or educate <u>individuals</u> about health issues;
- [c] Promote efforts among <u>public</u> and <u>private sector partners</u> to develop and fund programs or initiatives that identify and ameliorate health problems;
- [d] Conduct, fund, provide, or endorse performance management standards for the <u>public health</u> <u>system;</u>
- [e] Develop and provide certification, credentialing, or effective training for members of the <u>public</u> health workforce;
- [f] Develop, adopt, and implement public health plans through administrative regulations, formal policies, or collaborative recommendations that guide or support individual and community public health efforts;
- [g] Establish formal or informal relationships with <u>public</u> or <u>private sector partners</u> within the public health system;
- [h] Enforce existing laws and administrative regulations (including emergency regulations), and propose new laws, amendments to existing laws, or administrative regulations that may serve as tools to protect the public's health;
- [i] Identify, assess, prevent, and ameliorate <u>conditions of public health importance</u> through surveillance; epidemiological tracking, program evaluation, and monitoring; testing and <u>screening</u> programs; treatment; abatement of public health <u>nuisances</u>; administrative inspections; or other techniques;
- [j] Promote the availability and accessibility of quality health care services through <u>health care facilities</u> or <u>providers</u>;
- [k] Promote availability of and access to preventive and primary health care when not otherwise available through the private sector, including acute and episodic care, prenatal and postpartum care, child health, family planning, school health, chronic disease prevention, child and adult immunization, testing and screening services, dental health, nutrition, and health education and promotion services; and
- [l] Systematically and regularly review the <u>public health system</u> to recommend modifications in its structure or other features to improve public health outcomes.

ARTICLE III PUBLIC HEALTH INFRASTRUCTURE

Section 3-101. Public Health Infrastructure

- [a] **In General.** A strong public health infrastructure is needed to achieve the mission of <u>public health</u> set forth in § 2-101, and provide <u>essential public health services and functions</u>, in collaboration with <u>public and private sector partners</u> within the <u>public health system</u>.
- [b] **Goals.** Developing a strong public health infrastructure requires the coordinated efforts of state and local public health agencies and their public and private sector partners within the public health system to:
 - (1) Identify and provide leadership for the provision of <u>essential public health services and</u> functions:
 - (2) Develop and support an information infrastructure that supports <u>essential public health</u> services and functions;
 - (3) Develop and provide certification, credentialing, or effective training for members of the <u>public health workforce</u>;
 - (4) Develop performance management standards for the <u>public health system</u> that are tied to improvements in public health outcomes or other measures;
 - (5) Consider participation in voluntary accreditation programs for <u>state</u> or <u>local public health</u> agencies;
 - (6) Provide incentives for and evaluation of workforce development efforts, performance management, and accreditation standards; and
 - (7) Comprehensively plan and set priorities for the accomplishment of <u>essential public health</u> services and functions.
- [c] **Resources.** To fulfill these and other goals underlying the development of a strong public health infrastructure, <u>state</u> and <u>local public health agencies</u> and others within the <u>public health system</u> shall consult and attempt to utilize national guidelines, initiatives, programs, and recommendations relating to improvements in public health infrastructure provided they are consistent with accomplishing the mission of <u>public health</u> in the state.

Section 3-102. Public Health Workforce

- [a] Leadership. State and local public health agencies and their public and private sector partners within the public health system may identify and encourage leaders to work through the state public health agency to develop, administer, and fulfill the requirements of this Article, and ensure the provision of essential public health services and functions.
- [b] Certification or Credentialing for the Public Health Workforce. Consistent with any national system of <u>public health workforce</u> certification or credentialing, the <u>state public health agency</u> may adopt and administer <u>public health workforce</u> certification or credentialing programs for members of the <u>public health workforce</u>. These programs should be designed to develop knowledge, skills, and abilities in relevant and contemporary <u>public health</u> practice areas, and may be based on:
 - (1) Basic, core, or technical competencies (and corresponding curriculum) for public health workers; or
 - (2) Professional codes for public health professionals.
- [c] **Training.** The <u>state public health agency</u> may directly, or in conjunction with educational institutions or others within the <u>public health system</u>, make available or assure effective programs, continuing education, or other tools for training <u>public health agents</u> and others within the <u>public health workforce</u>.

Various <u>individuals</u> within the <u>public health system</u> may be required by the <u>state public health agency</u> to meet minimal training requirements to assist the <u>individual</u> in providing <u>essential public health services and</u> functions.

Section 3-103. Performance Management

To improve the public's health, the <u>state public health agency</u> may manage performance related to public health infrastructure and capacity, processes, and outcomes at the state and local levels. In consultation with relevant entities within the <u>public health system</u>, the <u>state public health agency</u> may seek to establish and implement performance standards, measures, and processes for quality or performance improvement that are accessible, affordable, and non-punitive. The <u>state public health agency</u> may adopt and administer performance measurements within the <u>public health system</u> as a means of improving the quality of state and local public health practice and improving system accountability.

Section 3-104. Accreditation of State or Local Public Health Agencies

The <u>state public health agency</u> may participate in a voluntary national accreditation program for <u>public health agencies</u> that is based on the ability of agencies to provide <u>essential public health services and functions</u>. The <u>state public health agency</u> may also develop a voluntary accreditation program for <u>local public health agencies</u> or <u>public</u> or <u>private sector partners</u> that may be based on, but not limited to, the national accreditation program.

Section 3-105. Incentives and Evaluations

- [a] **Incentives.** The <u>state public health agency</u> may set incentives to meet <u>public health workforce</u>, performance management, or accreditation standards or goals, including:
 - (1) Organizational accountability awards;
 - (2) Recognition for <u>public health agencies</u> or their <u>contractors</u> or <u>volunteers</u>; and
 - (3) Other development initiatives, including financial benefits.
- [b] **Evaluations.** The <u>state public health agency</u> shall adopt and administer frameworks and standards for evaluating workforce development, performance management, and accreditation goals.

Section 3-106. Public Health Planning, and Priority Setting

- [a] **Comprehensive Public Health Plan.** To promote the provision of <u>essential public health services</u> <u>and functions</u>, the <u>state public health agency</u> shall assure the development of a comprehensive, statewide public health plan that assesses and sets priorities for the <u>public health system</u>.
 - (1) The plan shall be developed in consultation with the public health advisory council and other representatives from <u>public</u> and <u>private sector partners</u> within the <u>public health system</u>.
 - (2) The plan may rely on existing or available surveillance data or other information <u>acquired</u> pursuant to this <u>Act</u>, as well as subject-specific public health plans or national guidelines or recommendations concerning public health outcomes/improvements.
 - (3) The plan shall be produced by [insert date].
- [b] **General Scope.** The plan shall assess and set priorities for the statewide <u>public health system</u> and shall:
 - (1) Guide the public health system in targeting <u>essential public health services and functions</u> through program development, implementation, and evaluation;
 - (2) Strive to increase the efficiency and effectiveness of the <u>public health system</u>;
 - (3) Identify areas needing greater resource allocation to provide <u>essential public health services</u> <u>and functions</u>; and
 - (4) Incorporate goals and priorities of public health plans developed by <u>local public health</u> <u>agencies</u>.

Please Note - Defined terms are <u>underlined</u> except in Article, Section, or subsection titles.

- [c] **Elements.** The plan shall include or address the following elements:
 - (1) Identification and quantification of existing public health problems, disparities, or threats at the state and local levels;
 - (2) Identification of existing public health resources at the state and local levels;
 - (3) Declaration of the goals of the plan;
 - (4) Identification of specific recommendations for meeting these goals;
 - (5) Explanation for the prioritization of one or more <u>conditions of public health importance</u>;
 - (6) Detailed description of strategies to develop and promote culturally and linguistically appropriate services;
 - (7) Development of an information infrastructure that supports <u>essential public health services</u> and functions;
 - (8) Detailed description of the programs and activities that will be pursued to address existing public health problems, disparities, or threats;
 - (9) Detailed description of how public health services will be integrated and public health resources shared to optimize efficiency and effectiveness of the <u>public health system</u>;
 - (10) Detailed description of how the plan will support <u>local public health agencies</u> in achieving the goals of their local public health plans;
 - (11) Estimation of costs of implementing the plan;
 - (12) Time-line for implementing various elements of the plan;
 - (13) Strategy for coordinating service delivery within the <u>public health system</u>;
 - (14) Measurable indicators of effectiveness (or ineffectiveness) and successes (or failures); and
 - (15) Recommendations for legislative or regulatory amendments.
- [d] **Duration.** The plan shall prospectively cover [five years], subject to annual revisions. Future plans shall be produced every [five years].
- [e] **Local Public Health Plans.** Local public health agencies may prepare a local public health plan consistent with the comprehensive public health plan required under subsection [a].
 - (1) Local public health plans may:
 - (i) Examine data about health status and risk factors in the local community;
 - (ii) Assess the capacity and performance of the local public health system;
 - (iii) Identify goals and strategies for improving the health of the local community;
 - (iv) Describe how representatives of the local community engage in developing and implementing the plan; and
 - (v) Address how <u>local public health agencies</u> coordinate with the <u>state public health agency</u> and others within the <u>state public health system</u> to accomplish goals and priorities identified in the comprehensive public health plan.
 - (2) The <u>state public health agency</u> shall encourage and provide technical assistance to local public health agencies that request such assistance and otherwise work with <u>local public health agencies</u> to generate the plan.
- [f] **Reports.** The <u>state public health agency</u> shall make available the comprehensive public health plan required under subsection [a] to the Governor, the [*State legislature*], local public health agencies, and other <u>public</u> and <u>private sector partners</u>.

Section 3-107. Public Health Advisory Council

A public health advisory council may be created by [insert date] to serve as an advisory body to the <u>state public health agency</u> and the Governor on all matters related to the <u>public health system</u>, including the development of the comprehensive public health plan required under § 3-106[a].

- [a] The council shall be comprised of [fifteen] members appointed by the Governor in consultation with state and local public health agencies or others within the public health system. The appointment of each of the members shall be for staggered terms of [five years], and be subject to legislative approval.
- [b] Specific members shall be appointed to represent the <u>state public health agency</u>, <u>local public health agencies</u>, <u>tribal public health agencies</u> in the state, other state or local governmental bodies (e.g., relating to environmental protection, insurance, education, and labor), <u>health care facilities</u>, <u>health care providers</u>, <u>health insurers</u>, and the general public. State employees shall serve on the council in an advisory capacity. Additional members representing other relevant interests or organizations may also be appointed. Members of the council shall select their own chairperson who must also be a member.
- [c] The council may create subcouncils to serve as forums for addressing specific areas or needs concerning the <u>public health system</u>. At the discretion of the council chair, <u>individuals</u> may participate on a voluntary basis in subcouncil meetings.
- [d] Council members shall be compensated in accordance with existing state law concerning council representatives or committee members of pre-existent advisory councils.
- [e] The council shall be adequately funded and staffed to conduct its operations and meet at least twice quarterly each year.

ARTICLE IV COLLABORATION AND RELATIONSHIPS WITH PUBLIC AND PRIVATE SECTOR PARTNERS

Section 4-101. Relationships among Federal, Tribal, State, or Local Public Health Agencies

- [a] **In General.** State or local public health agencies shall seek to establish strong, working relationships with corresponding federal, tribal, other <u>state</u> or <u>local public health agencies</u>, or other <u>public sector partners</u>, engaged in the provision of <u>essential public health services and functions</u> within the <u>public health system</u>.
- [b] **Federal-state Agreements.** The <u>state public health agency</u> may form an agreement with any federal agency to coordinate the provision of essential public health services and functions.
- [c] **Inter-state Agreements.** The <u>state public health agency</u> may form an agreement with any other state or its agencies to coordinate the provision of <u>essential public health services and functions</u> among the states that are parties to the agreement.
- [d] Inter-local Agreements. Any <u>local public health agency</u> may form agreements with other <u>local public health agencies</u> in the state to coordinate the provision of <u>essential public health services and functions</u> consistent with [the state's existing inter-local cooperation act (if any)]. The <u>local public health agency</u> shall submit any agreement pursuant to this section to the <u>state public health agency</u>.
- [e] Agreements between Local Public Health Agencies and Adjoining States and Municipalities. A local public health agency that borders a state line may form an agreement with an adjoining state or municipality in the other state to coordinate the provision of essential public health services and functions. The local public health agency shall submit any agreement pursuant to this section to the state public health agency for prior approval.
- [f] **Tribal Agreements.** A <u>state</u> or <u>local public health agency</u> may form agreements with <u>tribes</u> and <u>tribal public health agencies</u> in the state, and a <u>state public health agency</u> may form agreements with <u>tribes</u> and <u>tribal public health agencies</u> in adjoining states, to coordinate the provision of <u>essential public health</u> <u>services and functions</u> or to promote cooperation in addressing specific <u>public health</u> needs of Indians and non-Indians living on or near an Indian reservation, or Indians who reside outside the boundaries of such reservations. Among other purposes, these agreements may work to:
 - (1) Develop, test, or demonstrate solutions for specific public health needs that, if proven effective, may be applied by other <u>public health agencies</u>, <u>tribal organizations</u>, or <u>tribal public health agencies</u>, <u>inter-tribal organizations</u>, or other entities;
 - (2) Fund start-up and recurring costs of cooperative programs to deliver public health services to <u>individuals</u> located within tribal service areas as defined in the agreement;
 - (3) Conduct public health needs assessments and studies related to <u>public health</u> or health care issues concerning individuals located within tribal service areas;
 - (4) Provide for data sharing among <u>state</u>, <u>local</u> and <u>tribal public health agencies</u>, including sharing of <u>identifiable health information</u>;
 - (5) Provide for collaborative development of public health plans; or
 - (6) Encourage and support any other activity that will assist <u>state</u>, <u>local</u> and <u>tribal public health</u> <u>agencies</u> to improve or maintain the public's health.
- [g] **Public Health Districts.** Public health districts consisting of two or more <u>local</u> or <u>tribal public</u> <u>health agencies</u> may be created by the agencies (via resolution) for the purpose of improving the provision of <u>essential public health services and functions</u> for the affected population. The public health district shall consist of all the area of the combined <u>public health agencies</u>, and be classified and governed in accordance with state law.

Section 4-102. Relationships among Public and Private Sector Partners

- [a] **In General.** Population-based, community-level interventions to improve the conditions in which <u>individuals</u> can be healthy are critical to improving the public's health. Accordingly, pursuant to this Section, <u>state</u> or <u>local public health agencies</u> may establish formal or informal working relationships with <u>public</u> and <u>private sector partners</u> within the <u>public health system</u> to improve the provision of <u>essential public health services and functions</u>.
- [b] **Formal Agreements with Private Sector Partners.** In addition to the authorization to make formal agreements with <u>public sector partners</u> pursuant to § 4-101, <u>state</u> or <u>local public health agencies</u> may form contracts or agreements with <u>private sector partners</u>, whether located in-state or out-of-state, to provide <u>essential public health services and functions</u>.
- [c] **Community Partnerships.** Outside formal contracts or agreements, <u>state</u> or <u>local public health</u> <u>agencies</u> are encouraged to engage <u>public</u> or <u>private sector partners</u> through community or <u>public/private</u> partnerships to provide <u>essential public health services and functions</u>.
- [d] **Coordination.** To facilitate <u>public health</u> activities and functions among many <u>public</u> or <u>private sector partners</u>, the <u>state public health agency</u> shall coordinate the efforts of these <u>persons</u> and <u>local public health agencies</u>. The <u>state public health agency</u> may use any or all of the following tools for the purpose of coordinating activities:
 - (1) Ongoing and regular communication via electronic or other means;
 - (2) Widespread incorporation of <u>public</u> and <u>private sector partners</u> into the public health planning process referenced in § 3-106;
 - (3) Local, regional, or state-wide conferences or programs to share information or pursue plans for assessment, policy development or strategy, or assurance activities; or
 - (4) Designation of leading collaborators within specific geographic, topical, or practice areas that can facilitate coordination efforts.
- [e] **Privatization.** Nothing in this Section limits the ability of <u>state</u> and <u>local public health agencies</u> to contract with <u>contractors</u> or other <u>private sector partners</u> for the purpose of providing <u>essential health services and functions</u> directly through these private sector entities. <u>State</u> and <u>local public health agencies</u> are specifically authorized to engage <u>contractors</u> or other <u>private sector partners</u> to provide select <u>essential public health services and functions</u> through <u>privatization</u>, provided:
 - (1) Contracts entered into pursuant to this Section shall be in accordance with the applicable laws and regulations governing public entities [pursuant to the Public Procurement Act, where applicable];
 - (2) Any <u>privatization</u> of existing <u>essential public health services and functions</u> is demonstrated in advance to have the potential to improve public health outcomes without causing harm to individuals or the public health system; and
 - (3) Privatized services are fully and regularly monitored by the contracting <u>public health</u> <u>agency</u> or others within the <u>public health system</u> besides those providing the services or functions. The <u>state public health agency</u> may devise, in consultation with others within the <u>public health system</u>, evaluation criteria to be used in conducting performance reviews of any <u>person</u> that provides privatized services or functions.

Section 4-103. Relationships among Participants in the Health Care System

Improving public health outcomes is dependent on the active role of health care providers, health care providers, health insurers collaborating with state and local public health agencies to provide essential public health services and functions. Consistent with this Section, state or local public health agencies shall work specifically with these participants in the health care system to build effective relationships and promote the participant's role in furthering the mission of public health.

- [a] **Health Care Providers and Facilities.** A <u>state</u> or <u>local public health agency</u> may engage in the following activities with <u>health care providers</u> and <u>health care facilities</u> located (or doing business) in its jurisdiction to ensure coordination in the provision of <u>essential public health services and functions</u>:
 - (1) Dissemination of information and training regarding the appropriate use of clinical preventive practice guidelines;
 - (2) Provision of information regarding the services and resources available through the <u>state</u> <u>public health agency</u> related to patient management or medical care practice;
 - (3) Development of contractual agreements covering medical care and patient services related to the provision of <u>essential public health services and functions</u>;
 - (4) Development and dissemination of data reporting methods and systems concerning the performance of public health diagnostic and investigative services and functions; and
 - (5) Development and dissemination of resources and tools for measuring <u>health care provider</u> performance regarding the provision of <u>essential public health services and functions</u>.
- [b] **Health Insurers.** The <u>state public health agency</u> may develop standards that promote the provision of <u>essential public health services and functions</u> for incorporation into group and individual insurance and health plan products (including licensed insurance sold by <u>health insurers</u>, HMO products, public employee health plans, and health plans for the state's Medicaid and Children's Health Insurance Program). Such standards may include:
 - (1) Reporting data related to <u>essential public health services and functions</u>;
 - (2) Tools and resources for use in measuring the quality of care determined by the health agency relating to essential public health services and functions;
 - (3) Coverage standards (including minimum benefit classes, permissible amount, duration and scope limitations, and definitions and terms) related to the diagnosis, treatment, and management of physical and mental health conditions during a public health emergency;
 - (4) Standards related to the use of provider networks in the event of a <u>public health emergency</u>, including the designation of certain facilities and providers as "in network" entities during such periods; or
 - (5) The incorporation into the contract of coverage of public health clinical practice guidelines:
 - (i) As part of group and individual health plans generally; and
 - (ii) For use in assessing, treating, and managing physical and mental health conditions during a public health emergency.

ARTICLE V PUBLIC HEALTH AUTHORITIES/POWERS

Section 5-101. Prevention and Control of Conditions of Public Health Importance

- [a] **In General.** A <u>state</u> or <u>local public health agency</u> is authorized to use the powers and provisions set forth in this Article to prevent, control, or ameliorate <u>conditions of public health importance</u> or accomplish other <u>essential public health services and functions</u>.
- [b] **Guiding Principles.** In carrying out these authorities or powers, the <u>state</u> or <u>local public health</u> <u>agency</u> is guided by the following principles:
 - (1) **Public health purpose.** The exercise of any public health authority or power shall further or support improving or sustaining the public's health by accomplishing <u>essential public</u> health services and functions.
 - (2) **Scientifically-sound practices.** Whenever possible, a <u>state</u> or <u>local public health agency</u> shall exercise its authorities or powers through procedures, practices, or programs that are based on modern, scientifically-sound principles and evidence.
 - (3) **Well-targeted intervention.** A <u>state</u> or <u>local public health agency</u> shall strive to design and implement interventions that are well-targeted to accomplishing <u>essential public health services and functions</u>. An agency should avoid using compulsory power in a manner that is over-broad (applying to more <u>individuals</u> than is necessary for the public's health).
 - (4) **Least restrictive alternative.** A <u>state</u> or <u>local public health agency</u> shall employ the least restrictive alternative in the exercise of its authorities or powers, especially compulsory powers. This means that where the agency may exercise one or more of its authorities or powers to accomplish <u>essential public health services and functions</u>, it shall, to the extent possible, employ the policy or practice that least infringes on the rights or interests of <u>individuals</u>. Employing the least restrictive alternative does not require the agency to adopt policies or programs that are less effective in protecting the public's health or safety.
 - (5) **Nondiscrimination.** State and <u>local public health agencies</u> shall not discriminate in an unlawful manner against <u>individuals</u> on the basis of their race, ethnicity, nationality, religious beliefs, sex, sexual orientation, or disability status.
 - (6) **Respect for dignity.** State and <u>local public health agencies</u> shall respect the dignity of each <u>individual</u> under their jurisdiction, regardless of their nationality, citizenship, or residency status.
 - (7) **Community involvement.** Protecting the public's health requires ongoing public health education and outreach to encourage, facilitate, and promote community participation in accomplishing public health goals.
- [c] **Mandatory or Compulsory Powers.** Whenever the <u>state</u> or <u>local public health agency</u> exercises mandatory or compulsory powers under § 5-106[c] (mandatory testing); § 5-106[d](1) (compulsory <u>screening</u>); § 5-107 (compulsory medical treatment); § 5-108 (<u>isolation</u> and <u>quarantine</u>); § 5-109 (vaccination); or any other authorization:
 - (1) The agency, wherever possible, should first request that the <u>individual</u> participate voluntarily with the exercise of the mandatory or compulsory power.
 - (2) Any <u>individual</u> of a defined class may be subjected to the exercise pursuant to a <u>court</u> order, provided the individual will not be directly harmed by the exercise.
 - (3) Any <u>individual</u> who fails to comply with a <u>court</u> order pursuant to this subsection shall be guilty of a misdemeanor under § 8-104[b].
 - (4) The <u>state</u> or <u>local public health agency</u> may also employ other public health interventions to eliminate the risk or danger to others or the public's health.

Please Note - Defined terms are <u>underlined</u> except in Article, Section, or subsection titles.

Section 5-102. Surveillance Activities - Sources of Information

- [a] **Compiling Data.** The <u>state</u> or <u>local public health agency</u> is authorized to collect, analyze, and maintain databases of identifiable or non-identifiable information related to:
 - (1) Risk factors identified for specific conditions of public health importance;
 - (2) Morbidity and mortality rates for conditions of public health importance;
 - (3) Community indicators relevant to conditions of public health importance; and
 - (4) Any other data needed to accomplish or further the mission or goals of <u>public health</u>, or provide <u>essential public health services and functions</u>.
- [b] **Data Sources.** The <u>state</u> or <u>local public health agency</u> is authorized to obtain information from federal, tribal, state, and local governmental agencies (including <u>tribal organizations</u>); <u>health care providers</u>; or other private and public organizations.
 - (1) The agency may use information available from other governmental and private sources, reports of hospital discharge data, information included in death certificates, other vital statistics, environmental data, and <u>public information</u>.
 - (2) The agency may request information from or inspect health care records maintained by <u>health care providers</u> that identify patients or characteristics of patients with reportable diseases or other <u>conditions of public health importance</u>.
- [c] **Data Uses.** <u>Identifiable health information</u> may only be <u>acquired</u>, <u>used</u>, <u>disclosed</u>, and <u>stored</u> consistent with Article VII of this <u>Act</u>. Non-identifiable data may be <u>acquired</u>, <u>used</u>, <u>disclosed</u>, or <u>stored</u> for any purpose or in any manner.

Section 5-103. Reporting

- [a] **In General.** The <u>state public health agency</u> shall establish a list of reportable diseases or other <u>conditions of public health importance</u>. The list may include diseases or conditions of humans or animals caused by exposure to <u>toxic</u> substances, microorganisms, or any other pathogens. The <u>state public health agency</u>:
 - (1) Shall prescribe the time, manner, and <u>person(s)</u> responsible for reporting for each disease or other <u>condition of public health importance</u>.
 - (2) Shall classify each reportable disease and condition according to its nature and the severity of its effect on the public's health.
 - (3) Shall regularly maintain and may revise the list of reportable disease and conditions.
 - (4) Shall establish registries for reportable diseases and conditions.
 - (5) Shall fully disseminate reporting requirements to <u>health care providers</u> or other <u>persons</u> required under this Section to report diseases or conditions.
 - (6) May enter into agreements or other arrangements with federal and <u>tribal public health</u> <u>agencies</u> for receipt and sharing of information regarding reportable diseases or other <u>conditions of public health importance</u>.
- [b] **Persons Required to Report.** Any <u>person</u> (including <u>health care providers</u>, pharmacists, laboratories, coroners, medical examiners, and veterinarians) who is required by the <u>state public health agency</u> to report a disease or other <u>condition of public health importance</u> to the <u>state</u> or <u>local public health agency</u> shall provide all known or suspected cases of <u>individuals</u> having a reportable disease or condition. Any other <u>person</u> who knows or suspects a case of a reportable disease or condition may provide available information concerning the case to the <u>local</u> or <u>state public health agency</u>, especially where the case has not been previously reported as required by the <u>state public health agency</u>.
 - [c] **Ordinary Skill.** Any <u>person</u> who is required to report a disease or other <u>condition of public</u>

<u>health importance</u> shall use ordinary skill in determining the presence of the reportable disease or condition. If the determination of the disease or condition is disputable and the disease or condition may have potential public health significance, a <u>state</u> or <u>local public health agency</u> shall request <u>tests</u> through the [*state laboratory*] or a certified laboratory to help resolve uncertainty.

- [d] **Information Sharing.** Each <u>local public health agency</u> shall transmit to the <u>state public health agency</u> [at least weekly] any information requested by the <u>state public health agency</u> concerning the reporting of diseases or conditions. The <u>state public health agency</u> may require expedited reporting by <u>local public health agencies</u> for designated diseases or conditions, including those referred to in subsection [f]. The <u>state public health agency</u> shall make available to federal, <u>tribal</u>, or <u>local public health agencies</u> all information collected regarding reportable diseases consistent with data use principles in Article VII.
- [e] **Electronic Reporting Systems.** The <u>state public health agency</u> may establish state-wide systems for electronic reporting to improve the accuracy and timeliness of reported or transmitted information. The system shall be technologically designed to ensure data security and compatibility with other state and federal public health reporting systems to the extent feasible.
 - [f] Reporting to Detect and Track a Public Health Emergency.
 - (1) **In general.** A <u>health care provider</u>, coroner, or medical examiner shall report to the <u>state</u> or <u>local public health agency</u> all cases of <u>individuals</u> who harbor any <u>condition of public health importance</u> that may be potential causes or indicators of a <u>public health emergency</u>.
 - (i) Reportable conditions include, but are not limited to, the diseases caused by the biological agents listed in 42 C.F.R. § 72, app. A (2000) and any illnesses or health conditions identified by the <u>state public health agency</u>.
 - (ii) For the purposes of this Section, the definition of "health care provider" includes out-of-state medical laboratories, provided that such laboratories have agreed to state reporting requirements.
 - (2) **Pharmacists.** A pharmacist shall report any unusual variations in prescription rates, types of prescriptions, or pharmacy visits that may be potential causes or indicators of a <u>public</u> <u>health emergency</u>. Prescription-related events that require a report include, but are not limited to:
 - (i) an unusual increase in the number of prescriptions of antibiotics or other pharmaceuticals or sales of over-the-counter pharmaceuticals to treat conditions that the state public health agency identifies through regulations; and
 - (ii) any prescription that treats a disease that is relatively uncommon, may be associated with <u>bioterrorism</u>, or may be caused by a biological agent referred to in § 5-103[f](1)(i).
 - (3) **Animal diseases.** A veterinarian, livestock owner, veterinary diagnostic laboratory director, or other <u>person</u> having the care of animals shall report animals having or suspected of having any diseases or conditions that may be potential causes or indicators of a <u>public health emergency</u>.
 - (4) **Manner of reporting.** For the purposes of this subsection, the report shall be made electronically or in writing within [twenty-four (24) hours] to the <u>state</u> or <u>local public health</u> agency. The report shall include as much of the following information as is available:
 - (i) the specific disease, illness, or condition that is the subject of the report;
 - (ii) the patient's name, date of birth, sex, race, occupation, and current home and work addresses;
 - (iii) the name and address of the reporting individual;

- (iv) concerning human cases related to animal or insect bites, the suspected locating information of the biting animal or insect, and the name and address of any known owner;
- (v) concerning animal cases, the suspected locating information of the animal, and the name and address of any known owner; and
- (vi) any other information needed to locate the human or animal subject for follow-up.

(5) Information sharing.

- (i) Whenever the <u>public safety authority</u> or other state or local government agency suspects, learns of, or confirms a case of a reportable <u>condition of public health</u> <u>importance</u>, an unusual cluster, or a suspicious event that may be the cause or indicator of a <u>public health emergency</u>, it shall immediately notify the <u>state and local public health agency</u>.
- (ii) Whenever the <u>state</u> or <u>local public health agency</u> suspects, learns of, or confirms a case of a reportable <u>condition of public health importance</u>, an unusual cluster, or a suspicious event that it reasonably believes has the potential to be caused by or be an indicator of <u>bioterrorism</u>, it shall immediately notify the <u>public safety authority</u>, and federal and tribal health and <u>public safety authorities</u>.
- (iii) Sharing of information on reportable conditions, unusual clusters, or suspicious events between <u>state</u> and <u>local public health agencies</u> and <u>public safety authorities</u> shall be restricted to the information necessary for the treatment, control, investigation, and prevention of a <u>public health emergency</u>.

Section 5-104. Epidemiologic Investigation

- [a] Investigating Conditions of Public Health Importance. The <u>state</u> or <u>local public health</u> <u>agency</u> may investigate <u>conditions of public health importance</u> through methods of epidemiological investigation. This includes identifying <u>individuals</u> who have been or may have been exposed to or affected by the condition, interviewing and <u>testing</u> those <u>individuals</u>, and <u>examining</u> facilities or materials that may pose a threat to the public's health.
- [b] Investigating Non-emergency Disease Outbreaks and Epidemics. The <u>state</u> or <u>local public</u> <u>health agency</u> may ascertain the existence of a non-emergency <u>disease outbreak</u> or <u>epidemic</u>, investigate potential sources of exposure or infection and ensure that they are subject to proper control measures, and define the distribution of the disease outbreak or epidemic.
- [c] Investigating Public Health Emergencies. The <u>state</u> or <u>local public health agency</u> may ascertain the existence of cases of an illness or other <u>conditions of public health importance</u> that may be potential causes or indicators of a <u>public health emergency</u>, investigate all such cases for sources of exposure or infection and to ensure that they are subject to proper control measures, and define the distribution of the illness or other condition.
- [d] **Investigation Components.** To fulfill these duties, a <u>state</u> or <u>local public health agency</u> may perform the following:
 - (1) **Identify individuals.** Acting on information developed in accordance with § 5-102 and § 5-103 of this Article, or other reliable information, the agency shall identify all <u>individuals</u> thought to have been exposed to any agent that may be a potential cause of the <u>disease</u> <u>outbreak</u>, <u>epidemic</u>, or <u>public health emergency</u>.
 - (2) **Interview and test individuals.** The agency shall counsel, interview, and <u>test</u> such <u>individuals</u> in accordance with § 5-106 and § 5-107 where needed to assist in the positive identification of those exposed or affected, and develop information relating to the source or spread of the disease or other condition of public health importance.

(3) **Examine facilities or materials.** The agency may, for <u>examination</u> purposes, close, evacuate, or <u>decontaminate</u> any facility or <u>decontaminate</u> or destroy any material when it reasonably believes that such facility or material may endanger investigators, other <u>individuals</u>, or the public's health.

Section 5-105. Counseling and Referral Services for Persons Exposed to Contagious Diseases

- [a] **Counseling and Referral Services Program.** The <u>state</u> or <u>local public health agency</u> shall establish voluntary, confidential programs for <u>counseling and referral services</u> (<u>CRS</u>). These services shall be available and easily accessible to all <u>individuals</u> with, or possibly exposed to, a <u>contagious disease</u> as determined by the <u>public health agency</u>.
- [b] **Notification Process.** The administration of any <u>CRS</u> program shall adhere to written regulations set forth by the <u>state public health agency</u>. In promulgating these regulations, the agency shall incorporate the principles of the subsections under this Section, as well as the following requirements:
 - (1) All information disclosed to a <u>CRS</u> counselor or <u>health care provider</u> in the context of <u>CRS</u> is confidential. <u>Contact</u> names or <u>contact</u> data may be used only for purposes of surveillance, epidemiologic investigation, diagnosis, treatment, and notification by the <u>state</u> or <u>local public health agency</u>.
 - (2) Any <u>individual</u> with a <u>contagious disease</u> who voluntarily participates in a <u>CRS</u> program shall be notified that any identified <u>contacts</u> may be informed of their potential exposure to the <u>contagious disease</u>.
 - (3) A <u>CRS</u> counselor may notify a <u>contact</u> after obtaining the informed consent of the <u>individual</u> with the <u>contagious disease</u> who voluntarily provided the <u>contact's</u> name, unless:
 - (i) The <u>CRS</u> counselor reasonably believes that the <u>individual</u> does not plan to notify known <u>contacts</u>, whereby the counselor may notify those <u>contacts</u> without individual informed consent; or
 - (ii) The <u>CRS</u> counselor reasonably believes that the <u>individual</u> is at a significant risk of harm should notification be made to the contact.
 - (4) Any disclosure of information about exposure to a <u>contagious disease</u> to a <u>contact</u> by the <u>CRS</u> counselor shall be made in person (where possible) and in a manner that attempts to protect the privacy of the <u>individual</u> with the <u>contagious disease</u> as well as the <u>contact</u>. A <u>CRS</u> counselor may not disclose, for example:
 - (i) The name or other identifying information of the <u>individual</u> who gave the <u>contact's</u> name; or
 - (ii) The date or period of the <u>contact's</u> exposure.
 - (5) A <u>CRS</u> program shall provide counseling, <u>testing</u>, diagnosis, treatment, or referral services to an <u>individual</u> with a <u>contagious disease</u> regardless of whether the <u>individual</u> discloses the names of any <u>contacts</u>.
- [c] **Notification Information.** Where not otherwise notified, <u>CRS</u> counselors shall inform any <u>contact</u> of the:
 - (1) Nature of the contagious disease;
 - (2) Methods of transmission and prevention of the disease;
 - (3) Location information for testing or treatment sites (where available); and
 - (4) Existence of local support groups, mental health services, and medical facilities.

If an <u>individual</u> with a <u>contagious disease</u> chooses to notify a <u>contact</u>, he or she should be encouraged

to provide the same information as stated above, and be provided counseling. The <u>CRS</u> counselor should use reasonable efforts to verify that the <u>contact</u> was actually notified.

[d] **Program Training and Evaluation.** A <u>CRS</u> program shall routinely train and evaluate the performance of counselors and other program personnel to ensure that high quality services are being provided.

Section 5-106. Testing, Examination, and Screening

- [a] In General. A <u>state</u> or <u>local public health agency</u> may establish and administer <u>testing</u>, <u>examination</u>, and <u>screening</u> procedures or programs to identify <u>conditions of public health importance</u> among <u>individuals</u> or the population.
- [b] **Requirements to Conduct Testing, Examination, or Screening.** In conducting any <u>test</u>, <u>exam</u>, or <u>screening</u> procedure or program, the <u>state</u> or <u>local public health agency</u> shall adhere to the following requirements:
 - (1) **Informed consent.** No <u>test</u>, <u>exam</u>, or <u>screening</u> shall be conducted without the prior informed consent of the <u>individual</u> (or <u>legal representative</u>) to whom the <u>test</u> or <u>exam</u> is being administered, except as otherwise provided in this Section or other state law;
 - (2) **Validity.** Concerning the administration of <u>tests</u> or <u>exams</u>, there must be available a valid and reliable <u>test</u> or <u>exam</u> for the <u>condition of public health importance</u>. Concerning <u>screening</u>, scientifically-sound methods that have adequate <u>predictive value</u> must be used;
 - (3) **Justification.** All <u>testing</u>, <u>examination</u>, or <u>screening</u> programs should identify a <u>condition of public health importance</u> that poses a threat to an <u>individual</u> or the public's health and may be avoided, cured, alleviated, or made less contagious through safe and effective treatment, modifications in individual behavior, or <u>public health</u> interventions;
 - (4) **Pre-test information.** Prior to <u>testing</u>, <u>examination</u>, or <u>screening</u>, the <u>state</u> or <u>local public</u> <u>health agency</u> must explain to the <u>individual</u> (or <u>legal representative</u>) the nature, scope, purposes, benefits, risks, and possible results of the <u>test</u>, <u>exam</u>, or <u>screening</u>; and
 - (5) **Post-test information.** In conjunction with or directly after the dissemination of the results of a <u>test</u>, <u>exam</u>, or <u>screening</u>, the <u>state</u> or <u>local public health agency</u> must fully inform the <u>individual</u> (or <u>legal representative</u>) of his or her results. If appropriate, the agency should provide counseling or inform the <u>individual</u> where such counseling services are available.
- [c] **Mandatory Testing and Examination.** The <u>state</u> or <u>local public health agency</u> may require <u>testing</u> or medical <u>examination</u> of any <u>individual</u> who has or may have been exposed to a <u>contagious</u> disease that poses a significant risk or danger to others or the public's health.
 - [d] Types of Screening Programs.
 - (1) **Compulsory screening.** The <u>state</u> or <u>local public health agency</u> may establish compulsory <u>screening</u> programs for <u>conditions of public health importance</u> that pose a significant risk or seriously threaten the public's health.
 - (2) **Conditional screening.** The <u>state</u> or <u>local public health agency</u> may establish conditional <u>screening</u> programs when necessary to achieve an important public health objective.
 - (i) All <u>individuals</u> of a defined class are subjected to the <u>screening</u>, <u>test</u> or <u>examination</u> as a condition of participating in or receiving a service or privilege.
 - (ii) If an <u>individual</u> refuses to undergo the <u>screening</u>, <u>test</u> or <u>exam</u>, the <u>state</u> or <u>local public</u> <u>health agency</u> may prevent that <u>individual</u> from participating in or receiving the service or privilege.
 - (3) **Routine voluntary screening.** The <u>state</u> or <u>local public health agency</u> may establish routine, regular, and ongoing <u>screening</u> programs for <u>conditions of public health</u>

<u>importance</u>. All <u>individuals</u> of a defined class are subjected to the <u>screening</u>, <u>test</u> or <u>exam</u> unless they choose to "opt-out" (<u>individuals</u> refuse to consent to the <u>screening</u>, <u>test</u> or <u>examination</u>).

Section 5-107. Compulsory Medical Treatment

- [a] **Duty to Provide Information.** Any <u>health care provider</u> or <u>public health agent</u> who <u>examines</u> or treats an individual who has a contagious disease shall instruct the individual about:
 - (1) Measures for preventing reinfection and spread of the disease; and
 - (2) The need for treatment until the <u>individual</u> is no longer infected.
- [b] **Mandatory Treatment.** The <u>state</u> or <u>local public health agency</u> may require any <u>individual</u> who has or may have been exposed to a <u>contagious disease</u> that poses a significant risk or danger to others or the public's health to complete an appropriate prescribed course of medication (including through directly-observed therapy where appropriate) to treat the <u>contagious disease</u>, and to follow infection control provisions for the disease.

Section 5-108. Quarantine and Isolation

- [a] **Authorization.** A <u>state</u> or <u>local public health agency</u> may <u>isolate</u> or <u>quarantine</u> an <u>individual</u> or group of <u>individuals</u> pursuant to rules or regulations promulgated by the <u>state public health agency</u> consistent with the provisions of this Section.
- [b] **Conditions and Principles.** The <u>state</u> or <u>local public health agency</u> shall adhere to the following conditions and principles when <u>isolating</u> or <u>quarantining individuals</u> or groups of <u>individuals</u>:
 - (1) <u>Isolation</u> and <u>quarantine</u> must be by the least restrictive means necessary to prevent the spread of a <u>contagious</u> or possibly <u>contagious disease</u> to others and may include, but are not limited to, confinement to private homes or other private and public premises.
 - (2) <u>Isolated individuals</u> must be confined separately from <u>quarantined individuals</u>.
 - (3) The health status of <u>isolated</u> and <u>quarantined individuals</u> must be monitored regularly to determine if they continue to require <u>isolation</u> or <u>quarantine</u>.
 - (4) If a <u>quarantined individual</u> subsequently becomes infected or is reasonably believed to have become infected with a <u>contagious</u> or possibly <u>contagious disease</u> he or she must promptly be removed to isolation.
 - (5) <u>Isolation</u> and <u>quarantine</u> must be immediately terminated when an <u>individual</u> poses no substantial risk of transmitting a <u>contagious</u> or possibly <u>contagious</u> disease to others.
 - (6) The needs of <u>individuals</u> who are <u>isolated</u> or <u>quarantined</u> shall be addressed in a systematic and competent fashion, including, but not limited to, providing adequate food, clothing, shelter, means of communication with those in <u>isolation</u> or <u>quarantine</u> and outside these settings, and competent medical care.
 - (7) Outside premises used for <u>isolation</u> and <u>quarantine</u> shall be maintained in a safe and hygienic manner and be designed to minimize the likelihood of further transmission of infection or other harms to <u>individuals isolated</u> and <u>quarantined</u>.
 - (8) To the extent possible, cultural and religious beliefs shall be respected in addressing the needs of <u>individuals</u>, and establishing and maintaining <u>isolation</u> and <u>quarantine</u> premises.
- [c] Entry into Isolation or Quarantine Premises. The <u>state</u> or <u>local public health agency</u> may authorize physicians, health care workers, or others access to <u>individuals</u> in <u>isolation</u> or <u>quarantine</u> as necessary to meet the needs of <u>isolated</u> or <u>quarantined individuals</u>. Any <u>individual</u> entering <u>isolation</u> or <u>quarantine</u> premises with or without authorization of the <u>state</u> or <u>local public health agency</u> may be isolated or quarantined where needed to protect the public's health.

- [d] **Temporary Isolation and Quarantine without Notice.** The <u>state</u> or <u>local public health agency</u> may temporarily <u>isolate</u> or <u>quarantine</u> an <u>individual</u> or groups of <u>individuals</u> through a written directive if delay in imposing the <u>isolation</u> or <u>quarantine</u> would significantly jeopardize the agency's ability to prevent or limit the transmission of a <u>contagious</u> or possibly <u>contagious disease</u> to others.
 - (1) **Content of directive.** The written directive shall specify the following:
 - (i) The identity of the <u>individual(s)</u> or groups of <u>individuals</u> subject to <u>isolation</u> or <u>quarantine</u>;
 - (ii) The premises subject to <u>isolation</u> or <u>quarantine</u>;
 - (iii) The date and time at which isolation or quarantine commences; and
 - (iv) The suspected contagious disease.
 - (2) **Copies.** A copy of the written directive shall be given to the <u>individual</u> to be <u>isolated</u> or <u>quarantined</u>. If the written directive applies to a group of <u>individuals</u> and it is impractical to provide individual copies, it may be posted in a conspicuous place in the <u>isolation</u> or <u>quarantine</u> premises.
 - (3) **Petition for continued isolation or quarantine.** Within ten (10) days after issuing the written directive, the <u>state</u> or <u>local public health agency</u> shall file a petition pursuant to § 5-108[e] for a <u>court</u> order authorizing the continued <u>isolation</u> or <u>quarantine</u> of the <u>individual</u> or groups of <u>individuals</u>.
- [e] **Isolation or Quarantine with Notice.** The <u>state</u> or <u>local public health agency</u> may make a written petition to a <u>court</u> for an order authorizing the <u>isolation</u> or <u>quarantine</u> of an <u>individual</u> or groups of individuals.
 - (1) **Content of petition.** The petition shall specify the following:
 - (i) The identity of the <u>individual(s)</u> or groups of <u>individuals</u> subject to <u>isolation</u> or <u>quarantine</u>;
 - (ii) The premises subject to <u>isolation</u> or <u>quarantine</u>;
 - (iii) The date and time at which isolation or quarantine commences;
 - (iv) The suspected contagious disease;
 - (v) A statement of compliance with the conditions and principles for <u>isolation</u> and quarantine of § 5-108[b]; and
 - (vi) A statement of the basis upon which <u>isolation</u> or <u>quarantine</u> is justified in compliance with this Section.

The petition shall be accompanied by the sworn affidavit executed by the <u>state</u> or <u>local public health</u> <u>agency</u> attesting to the facts asserted in the petition, together with any further information that may be relevant and material to the court's consideration.

- (2) **Notice.** Notice to the <u>individuals</u> or groups of <u>individuals</u> identified in the petition shall be accomplished in accordance with existing rules of civil procedure.
- (3) **Hearing.** A hearing must be held on any petition filed pursuant to this subsection within [forty-eight hours] of filing of the petition. In extraordinary circumstances and for good cause shown the state or local public health agency may apply to continue the hearing date on a petition filed pursuant to this Section for up to [five (5)] days. The court may grant the continuance in its discretion giving due regard to the rights of the affected individuals, the protection of the public's health, the severity of the need for quarantine or isolation, and other evidence.
- (4) **Order.** The court shall grant the petition if, by clear and convincing evidence, isolation or

- <u>quarantine</u> is shown to be reasonably necessary to prevent or limit the transmission of a contagious or possibly contagious disease to others.
- (i) An order authorizing <u>isolation</u> or <u>quarantine</u> shall not exceed thirty (30) days.
- (ii) The order shall (a) identify the <u>isolated</u> or <u>quarantined individuals</u> or groups of <u>individuals</u> by name or shared or similar characteristics or circumstances; (b) specify factual findings warranting <u>isolation</u> or <u>quarantine</u> pursuant to this Section; (c) include any conditions necessary to ensure that <u>isolation</u> or <u>quarantine</u> is carried out within the stated purposes and restrictions of this Section; and (d) be served on affected <u>individuals</u> or groups of <u>individuals</u> in accordance with existing rules of civil procedure.
- (5) **Continuances.** Prior to the expiration of an order issued pursuant to § 5-108[e](4), the <u>state</u> or <u>local public health agency</u> may move to continue <u>isolation</u> or <u>quarantine</u> for additional periods not to exceed thirty (30) days each.
- [f] Relief from Isolation and Quarantine. An <u>isolated</u> or <u>quarantined individual</u> or group of <u>individuals</u> may apply to a <u>court</u> for an order to show cause why isolation or quarantine should not be terminated. The <u>court</u> shall rule on the application to show cause within [forty-eight (48)] hours of its filing.
 - (1) **Remedies for breach of conditions.** An <u>isolated</u> or <u>quarantined individual</u> or groups of <u>individuals</u> may request a hearing in the <u>court</u> for remedies regarding breaches of the conditions of <u>isolation</u> or <u>quarantine</u>. A request for a hearing shall not stay or enjoin an <u>isolation</u> or <u>quarantine</u> order.
 - (i) Where extraordinary circumstances justify the immediate granting of relief, the <u>court</u> shall fix a date for hearing on the alleged matters within [twenty-four (24)] hours upon receipt of the request.
 - (ii) Otherwise, the <u>court</u> shall fix a date for hearing on the alleged matters within [five (5)] days upon receipt of the request.
 - (2) **Extensions.** In any proceedings brought for relief under this subsection, the <u>state</u> or <u>local public health agency</u> may move the <u>court</u> to extend the time for a hearing based on extraordinary circumstances. The <u>court</u> may grant the extension giving due regard to the rights of the affected <u>individuals</u>, the protection of the public's health, the severity of the need, and other evidence.
 - (3) **Proceedings.** If parties cannot personally appear before the <u>court</u>, proceedings may be conducted by their <u>legal representatives</u> and be held in a location or via any means that allows all parties to fully participate. The <u>court</u> may order the consolidation of individual claims into group claims where:
 - (i) The number of <u>individuals</u> affected is so large as to render individual participation impractical;
 - (ii) There are questions of law or fact common to the individual claims or rights to be determined;
 - (iii) The group claims or rights are typical of the affected individuals' claims or rights; and
 - (iv) The entire group can be adequately represented.
 - (4) **Appointment of counsel.** The <u>court</u> shall appoint counsel at governmental expense to represent <u>individuals</u> or groups of <u>individuals</u> who are or about to be <u>isolated</u> or <u>quarantined</u> and who are not otherwise represented by counsel. Appointments shall last throughout the duration of the <u>isolation</u> or <u>quarantine</u> of the <u>individual</u> or groups of <u>individuals</u>. The <u>state</u> or <u>local public health agency</u> must provide adequate means of communication between such <u>individuals</u> or groups and their counsel.

Please Note - Defined terms are <u>underlined</u> except in Article, Section, or subsection titles.

Section 5-109. Vaccination

- [a] In General. <u>State</u> and <u>local public health agencies</u> may require <u>vaccination</u> of any <u>individual</u> within their jurisdictions to prevent the introduction or spread of an <u>infectious disease</u> or other <u>condition</u> <u>of public health importance.</u>
- [b] Requirements for Conducting Vaccination Programs. In administering any <u>vaccine</u> or <u>vaccination</u> program, the <u>state</u> or <u>local public health agency</u> shall adhere to the following requirements:
 - (1) **Informed consent.** No <u>vaccine</u> or <u>vaccination</u> program shall be administered without the prior informed consent of the <u>individual</u> (or <u>legal representative</u>) to whom the <u>vaccine</u> is being administered, except as otherwise provided in this Section;
 - (2) **Validity.** The <u>state</u> or <u>local public health agency</u> must employ an approved, federally-<u>licensed vaccine</u> for the <u>infectious disease</u> or other <u>condition of public health importance</u>;
 - (3) **Justification.** All <u>vaccination</u> programs should further legitimate public health purposes by addressing a <u>condition of public health importance</u> that may be avoided, alleviated, or made less contagious through safe and effective <u>vaccination</u>; and
 - (4) **Pre-vaccination information.** Prior to <u>vaccination</u>, the <u>individual</u> (or <u>legal representative</u>) must be informed of the nature, purposes, benefits, risks, and possible results of the vaccination.
- [c] **Provision of vaccines.** <u>Vaccinations</u> may be administered by physicians, paramedical personnel, registered nurses, pharmacists, or authorized, trained representatives of the <u>state</u> or <u>local public health agency</u>, a health program operated by the federal government, or a <u>tribe</u> or <u>tribal organization</u>, provided any <u>individual</u> administering a <u>vaccine</u>:
 - (1) Is competent in the administration of the <u>vaccine</u>, including knowledge of indications and contraindications of the <u>vaccine</u>, and recognition and treatment of any emergency reactions to the <u>vaccine</u> that may endanger the health or life of the recipient; and
 - (2) Possesses, and is capable of administering, medications and equipment as needed to treat any emergency conditions or reactions caused by the <u>vaccine</u> that may endanger the health or life of the recipient.
- [d] **Certification of Vaccination.** Any <u>person</u> authorized to perform <u>vaccinations</u> under this Section shall certify on a form developed by the <u>state public health agency</u> that a named <u>individual</u> has been <u>vaccinated</u> on a given date for specific conditions in accordance with applicable rules and regulations. This certification of <u>vaccination</u> shall be the principal means of demonstrating compliance with <u>vaccination</u> requirements. The <u>person</u> providing the <u>vaccination</u> shall file a copy of the certification in the <u>vaccination</u> registry.
- [e] **Registry.** The <u>state public health agency</u> shall collect epidemiological information to establish and maintain a comprehensive <u>vaccination</u> registry to aid, coordinate, and promote effective and cost-efficient disease prevention and control efforts. The registry shall serve as a repository of accurate, complete, and current <u>vaccination</u> records in the State. In consultation with <u>health care providers</u>, the agency shall utilize information in the registry to notify <u>individuals</u> (or their <u>legal representatives</u>) concerning the need for and access to a particular type of <u>vaccination</u> pursuant to published <u>vaccination</u> schedules adopted by the agency.
- [f] Vaccination Clinics. Each <u>local public health agency</u> shall establish or work with other agencies to establish one or more clinics to provide <u>vaccinations</u> to <u>individuals</u> within its jurisdiction who are not able to, or do not, receive <u>vaccinations</u> through <u>health care providers</u>.
- [g] **School or Licensed Day Care Vaccination Requirements.** Except as otherwise provided by law, no <u>individual</u> shall be admitted to a public or private school, or <u>licensed</u> child day care facility, of this state who has not been age-appropriately <u>vaccinated</u> for any <u>infectious diseases</u> or other <u>conditions of public health importance</u> as required by the state public health agency.

- (1) The <u>state public health agency</u> shall adopt and promulgate rules and regulations to protect children from <u>infectious diseases</u> consistent with the recommendations of the Centers for Disease Control and Prevention's Advisory Committee on Immunization Practices (ACIP) and the American Academy of Pediatrics Committee. Such rules and regulations shall include at least the following:
 - (i) The designation of a basic series of <u>vaccinations</u> to be administered consistent with the published schedule of <u>vaccinations</u> recommended by the Centers for Disease Control and Prevention;
 - (ii) The requirement that all <u>individuals</u> at any age or level of education as determined by the agency shall have been <u>vaccinated</u> prior to enrollment in school or licensed child day care facility; begun the series of <u>vaccinations</u> not later than the time of enrollment, to be completed within a reasonable time as determined by the agency; or presented written documentation of any claim of prior <u>vaccination</u> in the form of a certification of <u>vaccination</u> or other documentation as defined by the agency;
 - (iii) Provisions for the exclusion from school or day care attendance of <u>individuals</u> who have not been <u>vaccinated</u> or who do not meet the requirements for <u>vaccination</u> within the time prescribed; and
 - (iv) Provisions for written notification to the parent or legal guardian of a minor attendee regarding a pending exclusion under this subsection.
- (2) Responsibility for the enforcement of school <u>vaccination</u> requirements rests equally with each school district or licensed child day care facility of this state and with the <u>individual</u> (or <u>legal representative</u>) who is to attend any public or private school.
- (3) Each school district or licensed child day care facility shall cooperate with <u>local public</u> <u>health agencies</u> to prevent and control <u>contagious diseases</u> among attendees. The school district or day care facility may allow any <u>person</u> authorized by this Section to administer a vaccine to any attendee with the attendee's (or legal representative's) consent.
- (4) An attendee shall be exempt from these requirements upon presentation of a certification of vaccination pursuant to § 5-109[d], or where excepted from vaccination under § 5-109[h].
- (5) During a <u>public health emergency</u>, or if there is a <u>vaccine-preventable disease outbreak</u> or an <u>epidemic</u> of any <u>contagious disease</u> as determined by the <u>state</u> or <u>local public health agency</u>, any exempted attendee may be temporarily excluded from attendance unless and until the attendee has been <u>vaccinated</u> consistent with the agency's requirements or the attendee's presence no longer presents any risk to the attendee's or the public's health.
- [h] Exceptions. No <u>individual</u> shall be required to be <u>vaccinated</u> pursuant to this Section when:
 - (1) The <u>individual</u> has an existing physical disability or reasonable certainty of a reaction detrimental to that <u>individual</u> which may contraindicate <u>vaccination</u> based on the recommendations of the Centers for Disease Control and Prevention's Advisory Committee on Immunization Practices (ACIP) and the American Academy of Pediatrics Committee;
 - (2) The <u>individual</u> has produced medical confirmation of experiencing the natural disease against which the <u>vaccination</u> protects, thus rendering the administration of the <u>vaccine</u> ineffectual;
 - (3) The <u>individual</u> has produced laboratory confirmation of the presence of existing adequate immunity; or
 - (4) The <u>individual</u> (or <u>legal representative</u>) objects in a written, signed affidavit issued pursuant to a <u>court</u> order on the basis that the <u>vaccination</u> interferes with the free exercise of the individual's (or legal representative's) sincere religious beliefs.

- [i] **Procurement.** The <u>state</u> or <u>local public health agency</u> shall negotiate for the purchase of <u>vaccines</u> not provided for through federal <u>vaccine</u> contracts administered by the Centers for Disease Control and Prevention to achieve the purposes of this Section. The agency shall secure and maintain facilities to safely and adequately preserve and store <u>vaccines</u>.
- [j] **Immunity.** A <u>person</u> who administers or authorizes the administration of a <u>vaccine</u> under this Section is immune from criminal or civil liability for:
 - (1) Any injury caused by the <u>vaccine</u> if the <u>vaccination</u> was required by the <u>state public health</u> <u>agency</u>, and the administration did not involve willful misconduct or gross negligence; or
 - (2) The failure to <u>vaccinate</u> or other dependent because of the failure or refusal of a <u>legal</u> representative to consent to the <u>vaccination</u>.

Section 5-110. Licenses

- [a] License Required to Engage in Specified Activities. The <u>state</u> or <u>local public health agency</u> shall promulgate regulations requiring a <u>license</u> to own or operate a place or business or engage in an activity that may be detrimental to the public's health.
- [b] **Scope.** The <u>state</u> or <u>local public health agency</u> shall determine those businesses or activities that are subject to <u>license</u> requirements under this Section, including but not limited to the following:
 - (1) Places or businesses—(*e.g.*, child care facilities, food service establishments, <u>health care facilities</u>, nail salons, nursing facilities, retail establishments, tattoo parlors, temporary vendors).
 - (2) Activities—(e.g., barbers, cosmeticians, food handlers or servers, manicurists, medical practitioners, pharmacists).
- [c] **Application.** To obtain a <u>license</u>, a <u>person</u> must submit an application to the <u>state</u> or <u>local</u> <u>public health agency</u> on a form approved by the agency accompanied by the <u>license</u> fee (in an amount to be determined by the agency).
- [d] **Issuance.** On receiving a <u>license</u> application, the <u>state</u> or <u>local public health agency</u> may inspect the applicant's facilities, operations, and premises to determine whether the applicant meets the conditions of the <u>license</u>. The agency shall issue a <u>license</u> to each applicant who meets the conditions of the <u>license</u> for conducting the business or activity.
- [e] **Violations.** If the <u>state</u> or <u>local public health agency</u> finds that a violation of a <u>condition</u> of a <u>license</u> has occurred or is occurring, the agency shall give written notice to the recipient describing the nature of the violation and demanding that the violation cease.
 - (1) The <u>state</u> or <u>local public health agency</u> may initiate proceedings to revoke the <u>license</u> if the recipient refuses or fails to comply with the notice in the time and manner directed in the notice.
 - (2) When the <u>state</u> or <u>local public health agency</u> determines that a violation of a <u>license</u> presents an imminent threat to the public's health, the agency may immediately act to abate or stop the activities of the recipient that are in violation of the <u>license</u>.
- [f] **Renewal.** A <u>person</u> holding a <u>license</u> must renew the <u>license</u> prior to its expiration date by submitting a renewal application and accompanying fee to be determined by the <u>state</u> or <u>local public</u> <u>health agency</u>. The agency shall not renew the <u>license</u> of a <u>person</u> that has not corrected deficiencies or violations of the license conditions.

Section 5-111. Public Health Nuisances

[a] **Nuisance Prohibited.** It is unlawful for any <u>person</u> to create, aggravate, or allow the existence of a <u>nuisance</u>.

- [b] **Identification.** A <u>state</u> or <u>local public health agency</u> may immediately and thoroughly investigate any suspected <u>nuisance</u> upon receiving a complaint of its existence or when there is probable cause to believe that a <u>nuisance</u> exists within the agency's jurisdiction.
- [c] **Abatement.** A <u>state</u> or <u>local public health agency</u> may issue an order to avoid, correct, or remove, at the owner's expense, any property or condition that the agency determines to be a <u>nuisance</u>.
 - (1) The order shall specify the nature of the <u>nuisance</u> and the method(s) to abate the <u>nuisance</u>, including:
 - (i) To close, direct, and compel the evacuation of, or decontaminate or cause to be decontaminated any real property as needed; or
 - (ii) To decontaminate or cause to be decontaminated, or destroy, any material, goods, or conditions.
 - (2) The order shall designate a reasonable time in which the <u>nuisance</u> must be abated.
 - (3) If a property owner or occupant does not comply with the order within the specified time, the <u>state</u> or <u>local public health agency</u> may cause the <u>nuisance</u> to be removed or abated at the owner or occupant's expense.
 - (4) Whenever the removal or abatement of a <u>nuisance</u> requires immediate action by the <u>state</u> or <u>local public health agency</u>, the agency may pay the costs of removal or abatement and seek reimbursement for expenses from the responsible <u>persons</u>.
 - (5) If the <u>person</u> responsible for a <u>nuisance</u> refuses to pay or reimburse expenses incurred by the <u>state</u> or <u>local public health agency</u>, expenses may be:
 - (i) Assessed against affected real property as a lien;
 - (ii) Collected from rents paid on real property, pursuant to a <u>court</u> order obtained by the <u>state</u> or <u>local public health agency</u>; or
 - (iii) Collected in the same manner as personal taxes assessed by the State.
 - (6) An occupant or other <u>person</u> who caused or permitted a <u>nuisance</u> to exist is liable to the owner of the premises for the amount paid by the owner or assessed against the property.

Section 5-112. Administrative Searches and Inspections

- [a] To Determine Existence of a Nuisance.
 - (1) Upon consent of the owner or custodian, a <u>public health agent</u> may enter any property at any reasonable time to inspect, investigate, evaluate, conduct <u>tests</u>, or take <u>specimens</u> or <u>samples</u> for <u>testing</u> as may be reasonably necessary to determine compliance with any law administered by the <u>state</u> or <u>local public health agency</u>.
 - (2) If the <u>public health agent</u> is denied entry, the agent may seek an administrative search warrant authorizing the investigation, evaluation, inspection, <u>testing</u>, or taking of <u>specimens</u> or <u>samples</u> for <u>testing</u>.
 - (3) When a <u>nuisance</u> is known by a <u>state</u> or <u>local public health agency</u> to exist on the premises and the <u>nuisance</u> poses an immediate threat to an <u>individual's</u> or the public's health, a <u>public health agent</u> may enter the affected property without the consent of the owner or custodian and without an administrative search warrant to inspect, investigate, and evaluate the conditions on the premises as may be reasonably necessary to abate the <u>nuisance</u>.
 - (4) A <u>public health agent</u> may enter any public place to inspect, investigate, evaluate, conduct <u>tests</u>, or take <u>specimens</u> or <u>samples</u> for <u>testing</u> as may be reasonably necessary to determine compliance with the provisions of any law administered by the <u>state</u> or <u>local public health</u> <u>agency</u>.

- [b] **To Determine Compliance with License Conditions.** Consistent with the terms and conditions of a <u>license</u>, a <u>public health agent</u> may enter at any reasonable time a property (on which activities are conducted pursuant to a <u>license</u>) to inspect, investigate, evaluate, conduct <u>tests</u>, or take <u>specimens</u> or <u>samples</u> for <u>testing</u> where reasonably necessary to determine compliance with the conditions of the <u>license</u>.
- [c] Additional Authority. This Section shall not limit the authority of any <u>state</u> or <u>local public</u> <u>health agency</u> to conduct an administrative search or inspection of public water or food supplies, restaurants, places of lodging, or any other public or private place under existing federal or state law.

ARTICLE VI PUBLIC HEALTH EMERGENCIES

Section 6-101. Planning for a Public Health Emergency

- [a] **Public Health Emergency Planning Commission.** The Governor shall appoint a public health emergency planning commission, consisting of the directors (or their designees) of federal, tribal, state, and local public health agencies and other agencies the Governor deems relevant to public health emergency preparedness, a representative group of state legislators, members of the judiciary, representatives of tribal governments, and any other persons chosen by the Governor. The Governor shall also designate the chair of the commission.
- [b] **Public Health Emergency Plan.** The commission shall, within [*six months*] of its appointment, deliver to the Governor a plan for responding to a <u>public health emergency</u> that includes provisions or guidelines in compliance with this Article on the following:
 - (1) Notifying and communicating with the population during a state of <u>public health</u> <u>emergency</u>;
 - (2) Central coordination of resources, manpower, and services, including responses by <u>persons</u> in the <u>public health system</u>;
 - (3) The location, procurement, storage, transportation, maintenance, and distribution of essential materials, including medical supplies, drugs, anti-toxins, vaccines, food, shelter, sanitation, clothing, and beds;
 - (4) The continued, effective operation of the judicial system including the potential identification and training of personnel to serve as emergency judges for matters of <u>isolation</u> and <u>quarantine</u>;
 - (5) The method of evacuating populations, and housing and feeding the evacuated populations;
 - (6) The identification and training of <u>health care providers</u> to diagnose and treat <u>individuals</u> with <u>infectious diseases</u>, or <u>toxic exposures</u>, during an emergency;
 - (7) The treatment, decontamination, or vaccination of individuals;
 - (8) The safe disposal of <u>contaminated materials</u>, <u>infectious</u> or other <u>wastes</u>, and human remains;
 - (9) The safe and effective protection of <u>individuals isolated</u>, <u>quarantined</u>, <u>vaccinated</u>, <u>tested</u>, treated, or decontaminated during a state of public health emergency;
 - (10) The identification by state or local public health agencies of:
 - (i) Sites where <u>individuals</u> can be <u>isolated</u>, <u>quarantined</u>, or <u>decontaminated</u>;
 - (ii) Sites where medical supplies, food, and other essentials can be distributed to the population;
 - (iii) Sites where public health and emergency workers can be housed and fed; and
 - (iv) Routes and means of transportation of people and materials;
 - (11) Relevant cultural norms, values, religious principles, and traditions; and
 - (12) Other measures necessary to carry out the purposes of this Article.

The commission shall distribute this plan for comments to those within the <u>public health system</u> who will be responsible for its implementation, other interested <u>persons</u>, and the public, and annually review and modify the plan (as necessary).

Section 6-102. Declaring a State of Public Health Emergency

[a] **Declaration.** A state of <u>public health emergency</u> may be declared by the Governor upon the

occurrence of a <u>public health emergency</u>. Prior to such a declaration, the Governor shall consult with <u>state</u> and <u>local public health agencies</u> and may consult with any additional public health or other experts as needed. The Governor may act to declare a <u>public health emergency</u> without such consultations when the situation calls for prompt and timely action.

- [b] **Content of Declaration.** A state of <u>public health emergency</u> shall be declared by an executive order that specifies:
 - (1) The nature of the <u>public health emergency</u>;
 - (2) The political subdivision(s) or geographic area(s) subject to the declaration;
 - (3) The conditions that have brought about the <u>public health emergency</u>;
 - (4) The duration of the state of the <u>public health emergency</u>, if less than thirty (30) days; and
 - (5) The primary <u>state</u> or <u>local public health agency</u> responding to the emergency.
- [c] **Effect of Declaration.** The declaration of a state of <u>public health emergency</u> shall activate the response and recovery aspects of the state, local, and inter-jurisdictional disaster emergency plans in the affected political subdivision(s) or geographic area(s). Such declaration authorizes the deployment and use of any forces to which the plans apply and the use or distribution of any supplies, equipment, and materials and facilities assembled, stockpiled, or available pursuant to this Article.
 - [d] **Emergency Powers.** During a state of public health emergency, the Governor may:
 - (1) Suspend the provisions of any regulatory statute prescribing procedures for conducting state business, or the orders, rules and regulations of any state agency, where strict compliance with the same would prevent, hinder, or delay necessary action (including emergency purchases) to respond to the <u>public health emergency</u> by the <u>state</u> or <u>local public health agency</u>, or increase the health threat to the population.
 - (2) Utilize all available resources of the state government and its political subdivisions, as reasonably necessary to respond to the public health emergency.
 - (3) Transfer the direction, personnel, or functions of state departments and agencies to perform or facilitate response and recovery programs regarding the public health emergency.
 - (4) Mobilize all or any part of the <u>organized militia</u> into service. An order directing the <u>organized militia</u> to report for active duty shall state the purpose for which it is mobilized and the objectives to be accomplished.
 - (5) Provide aid to and seek aid from other states in accordance with any interstate agreements.
 - (6) Seek aid from the federal government in accordance with federal programs or requirements.
- [e] **Coordination.** The <u>state public health agency</u> shall coordinate all matters pertaining to the <u>public health emergency</u> response of the state. The agency shall have primary jurisdiction, responsibility, and authority for:
 - (1) Planning and executing <u>public health emergency</u> assessment, mitigation, preparedness response, and recovery;
 - (2) Coordinating public health emergency responses between state and local authorities;
 - (3) Collaborating with <u>public</u> and <u>private sector partners</u>, and elected officials of other states;
 - (4) Organizing <u>public information</u> activities regarding <u>public health emergency</u> response operations; and
 - (5) Coordinating recovery operations and mitigation initiatives subsequent to <u>public health</u> <u>emergencies</u>.
 - [f] **Identification.** After the declaration of a state of <u>public health emergency</u>, special identification

for all <u>persons</u> within the <u>public health system</u> shall be issued by the <u>state public health agency</u>. The identification shall indicate the authority of the bearer to exercise public health functions and emergency powers during the state of <u>public health emergency</u>. Public health personnel shall wear the identification in plain view.

[g] **Enforcement.** During a state of <u>public health emergency</u>, the <u>state public health agency</u> may request assistance in enforcing orders pursuant to this Article from the <u>public safety authority</u>. The <u>public safety authority</u> may request assistance from the <u>organized militia</u> to enforce the orders of the <u>state public health agency</u>.

[h] Termination of Declaration.

- (1) **Executive order.** The Governor shall terminate the declaration of a state of <u>public health</u> <u>emergency</u> by executive order upon finding that the circumstances or conditions that caused the emergency no longer exist.
- (2) **Automatic termination.** Notwithstanding any other provision of this Article, the declaration of a state of <u>public health emergency</u> shall be terminated automatically after thirty (30) days unless renewed for subsequent thirty (30) day periods by the Governor under the same standards and procedures set forth in this Section.
- (3) **State legislature.** By a majority vote in both chambers, the [*State legislature*] may terminate the declaration of a state of <u>public health emergency</u> any time after the date of original declaration upon finding that the circumstances or conditions that caused the emergency no longer exist. Such a termination by the [*State legislature*] shall override any renewal by the Governor.
- (4) **Content of termination order.** All orders or legislative actions terminating the declaration of a state of <u>public health emergency</u> shall indicate the nature of the emergency, the area(s) that was threatened, and the conditions that make possible the termination.
- [i] **Public Information Regarding a Public Health Emergency.** The <u>state</u> or <u>local public health agency</u> shall inform members of the public when a state of <u>public health emergency</u> has been declared or terminated, how to protect themselves, and what actions are being taken to control the emergency. The agency shall use all available and reasonable means to get the information promptly to the public through one or more languages (if necessary), and in a manner accessible to <u>individuals</u> with disabilities.

Section 6-103. Management of Property

- [a] **Emergency Measures Concerning Facilities and Materials.** During a state of <u>public health</u> <u>emergency</u>, the <u>state</u> or <u>local public health agency</u> is authorized:
 - (1) **Close facilities.** To close, direct, and compel the evacuation of, or decontaminate or cause to be decontaminated any facility of which it has reasonable cause to believe that it may endanger the public's health.
 - (2) **Use of materials and facilities.** To procure, by condemnation or otherwise, construct, lease, transport, store, maintain, renovate, or distribute materials and facilities as may be reasonable and necessary to respond to the <u>public health emergency</u>, with the right to take immediate possession thereof. Such materials and facilities include communication devices, carriers, real estate, fuels, food, and clothing.
 - (3) **Use of health care facilities.** To require a <u>health care facility</u> to provide services or the use of its facility if such services or use are reasonable and necessary to respond to the <u>public health emergency</u> as a condition of <u>licensure</u>, authorization or the ability to continue doing business in the state as a <u>health care facility</u>. The use of the <u>health care facility</u> may include transferring the management and supervision of the <u>health care facility</u> to the <u>state</u> or <u>local public health agency</u> for a limited period of time.

- **(4) Destruction of materials.** To <u>decontaminate</u> or cause to be <u>decontaminated</u>, or destroy, any material of which it has reasonable cause to believe that it may endanger the public's health.
- (5) **Control of materials.** To inspect, control, restrict, and regulate by rationing and using quotas, prohibitions on shipments, allocation, or other means, the use, sale, dispensing, distribution, or transportation of food, fuel, clothing and other commodities, as may be reasonable and necessary to respond to the public health emergency.
- [b] **Control of Roads and Public Areas.** During a state of <u>public health emergency</u>, the <u>state</u> or <u>local public health agency</u> is authorized:
 - (1) To prescribe routes, modes of transportation, and destinations in connection with evacuation of <u>individuals</u> or the provision of emergency services.
 - (2) To control or limit ingress and egress to and from any stricken or threatened public area, the movement of <u>individuals</u> within the area, and the occupancy of premises therein, if such action is reasonable and necessary to respond to the public health emergency.
- [c] **Safe Disposal of Infectious Waste or Contaminated Material.** During a state of <u>public health</u> <u>emergency</u>, the <u>state</u> or <u>local public health agency</u> is authorized:
 - (1) **Adopt measures.** To adopt and enforce measures to provide for the safe disposal of infectious waste or contaminated material as may be reasonable and necessary to respond to the <u>public health emergency</u>. Such measures may include the collection, storage, handling, destruction, treatment, transportation, and disposal of <u>infectious waste</u> or <u>contaminated</u> material.
 - (2) **Control of facilities.** To require any business or facility authorized to collect, <u>store</u>, handle, destroy, treat, transport, and dispose of <u>infectious waste</u> or <u>contaminated material</u> under the laws of this state, and any landfill business or other such property, to accept <u>infectious waste</u> or <u>contaminated material</u>, or provide services or the use of the business, facility, or property if such action is reasonable and necessary to respond to the <u>public health emergency</u> as a condition of <u>licensure</u>, authorization, or the ability to continue doing business in the state as such a business or facility. The use of the business, facility, or property may include transferring the management and supervision of such business, facility, or property to the <u>state</u> or <u>local public health agency</u> for a limited or unlimited period of time.
 - (3) **Use of facilities.** To procure, by condemnation or otherwise, any business or facility authorized to collect, store, handle, destroy, treat, transport, and dispose of <u>infectious waste</u> or contaminated material under the laws of this state and any landfill business or other such property as may be reasonable and necessary to respond to the <u>public health emergency</u>, with the right to take immediate possession thereof.
 - (4) **Identification.** To require all bags, boxes, or other containers for <u>infectious waste</u> or <u>contaminated material</u> to be clearly identified as containing <u>infectious waste</u> or <u>contaminated material</u>, and if known, the type of <u>infectious waste</u> or <u>contaminated material</u> (consistent with federal and state laws).
- [d] **Safe Disposal of Human Remains.** During a state of <u>public health emergency</u>, the <u>state</u> or <u>local public health agency</u> is authorized:
 - (1) **Adopt measures.** To adopt and enforce measures to provide for the safe disposal of human remains as may be reasonable and necessary to respond to the <u>public health emergency</u>. Such measures may include the embalming, burial, cremation, interment, disinterment, transportation, and disposal of human remains.
 - (2) **Possession.** To take possession or control of any human remains.

- (3) **Labeling.** To require clear labeling of every human remains prior to disposal with all available information to identify the decedent and the circumstances of death. Any human remains of a deceased <u>individual</u> with a <u>contagious disease</u> or <u>transmissible agent</u> shall have an external, clearly visible tag indicating that the human remains is infected and, if known, the <u>contagious disease</u> or <u>contaminated materials</u>.
- (4) **Identification.** To require <u>persons</u> in charge of disposing of any human remains to maintain a written or electronic record of each human remains and all available information to identify the decedent and the circumstances of death and disposal. If human remains cannot be identified prior to disposal, a qualified <u>individual</u> shall, to the extent possible, take fingerprints and photographs of the human remains, obtain identifying dental information, and collect a DNA <u>specimen</u>. All such information shall be promptly forwarded to the <u>state</u> or <u>local public health agency</u>.
- (5) Disposal. To order the disposal of any human remains of an <u>individual</u> who has died of a <u>contagious disease</u> or <u>transmissible agent</u> through burial or cremation within twenty-four (24) hours after death. To the extent possible, religious, cultural, family, and individual beliefs of the deceased <u>individual</u> or his or her family shall be considered when disposing of any human remains.
- (6) **Control of facilities.** To require any business or facility authorized to embalm, bury, cremate, inter, disinter, transport, and dispose of human remains under the laws of this state to accept any human remains or provide the use of its business or facility if such actions are reasonable and necessary to respond to the <u>public health emergency</u> as a condition of <u>licensure</u>, authorization, or the ability to continue doing business in the state as such a business or facility. The use of the business or facility may include transferring the management and supervision of such business or facility to the <u>state</u> or <u>local public health</u> agency for a limited or unlimited period of time.
- (7) **Use of facilities.** To procure, by condemnation or otherwise, any business or facility authorized to embalm, bury, cremate, inter, disinter, transport, and dispose of human remains under the laws of this state as may be reasonable and necessary to respond to the <u>public health emergency</u>, with the right to take immediate possession thereof.

[e] Control of Health Care Supplies.

- (1) **Procurement.** During a state of <u>public health emergency</u>, the <u>state</u> or <u>local public health agency</u> may purchase and distribute anti-toxins, serums, <u>vaccines</u>, immunizing agents, antibiotics, antidotes, and other pharmaceutical agents, medical supplies, or personal protective equipment to prepare for or control a <u>public health emergency</u>.
- (2) **Rationing.** Where a state of <u>public health emergency</u> results in a state-wide or regional shortage or threatened shortage of any product under subsection (1), whether or not such product has been purchased by the agency, the agency may control, restrict, and regulate by rationing and using quotas, prohibitions on shipments, allocation, or other means, the use, sale, dispensing, distribution, or transportation of the relevant product. In making rationing or other supply and distribution decisions, the agency may give preference to <u>health care providers</u>, disaster response personnel, and mortuary staff.
- (3) **Distribution.** During a state of <u>public health emergency</u>, the agency may store or distribute any anti-<u>toxins</u>, serums, <u>vaccines</u>, immunizing agents, antibiotics, antidotes, and other pharmaceutical agents, personal protective equipment, or medical supplies located within the state as may be reasonable and necessary to respond to the <u>public health emergency</u>, with the right to take immediate possession thereof. If a <u>public health emergency</u> simultaneously affects more than one state, nothing in this Section shall be construed to allow the <u>state</u> or <u>local public health agency</u> to obtain anti-<u>toxins</u>, serums,

Please Note - Defined terms are <u>underlined</u> except in Article, Section, or subsection titles.

- <u>vaccines</u>, immunizing agents, antibiotics, antidotes, and other pharmaceutical agents or medical supplies for the primary purpose of hoarding such items or preventing their fair and equitable distribution among affected states.
- [f] **Civil Proceedings.** To the extent practicable consistent with the protection of <u>public health</u>, prior to the destruction of any property under this Article, the <u>state</u> or <u>local public health agency</u> shall institute appropriate civil proceedings concerning the property to be destroyed in accordance with the existing laws and rules of the <u>courts</u> or any such rules that may be developed by the <u>courts</u> for use during a state of <u>public health emergency</u>. Any property <u>acquired</u> by the agency through such proceedings shall, after entry of the decree, be disposed of by destruction as the <u>court</u> may direct.

Section 6-104. Protection of Individuals

- [a] **In General.** During a state of <u>public health emergency</u>, the <u>state</u> or <u>local public health agency</u> shall use every available means to prevent the transmission of <u>infectious disease</u> or exposure to <u>toxins</u> and apply proper controls and treatment in all cases of <u>contagious disease</u> or <u>toxic</u> exposures.
- [b] **Existing Powers.** During a state of <u>public health emergency</u>, the <u>state</u> or <u>local public health agency</u> may perform or administer <u>tests</u>, <u>examinations</u>, <u>screenings</u>, treatment, <u>isolation</u>, <u>quarantine</u>, decontamination, or vaccination consistent with § 5-106, § 5-107, § 5-108, and § 5-109.
- [c] Collection of Laboratory Specimens; Performance of Tests. During a state of <u>public health</u> <u>emergency</u>, the <u>state</u> or <u>local public health agency</u> may collect <u>specimens</u> or environmental <u>samples</u> and perform <u>tests</u> on living and deceased <u>individuals</u>, environmental <u>samples</u>, and any animal (living or deceased), and <u>acquire</u> any previously collected <u>specimens</u>, <u>samples</u>, or <u>test</u> results that are reasonable and necessary to respond to the <u>public health emergency</u>.
 - (1) **Contamination.** Specimen or sample collection, handling, storage, and transport to the testing site shall be performed in a manner that will reasonably preclude specimen contamination or adulteration and provide for the safe collection, storage, handling, and transport of such specimen. All specimens or samples shall be clearly marked.
 - (2) Chain of custody. Any person authorized to collect specimens or samples or perform tests shall establish chain of custody on the collected materials using forms and procedures approved by the court. Chain of custody, labeling, identification of the specimen or sample, and proper records shall be maintained during transport to the testing locations, during the testing process, and until the specimen or sample is either released by the court, or permission is given to destroy the specimen or sample. This requirement applies to all specimens or samples, including those collected using on-site testing kits.
 - (3) **Criminal investigation.** Recognizing that, during a state of <u>public health emergency</u>, any <u>specimens</u> or <u>samples</u> collected or <u>test</u> performed may be evidence in a criminal investigation, any <u>person</u> authorized to collect or transport <u>specimens</u> or <u>samples</u>, or perform <u>tests</u>, shall provide such support as is reasonable and necessary to aid in a relevant criminal investigation.
- [d] **Licensing and Appointment of Health Personnel.** During a state of <u>public health emergency</u>, the <u>state</u> or <u>local public health agency</u> is authorized:
 - (1) **Health care providers.** To require in-state <u>health care providers</u> to assist in the performance of <u>vaccination</u>, treatment, examination, <u>testing</u>, <u>decontamination</u>, <u>quarantine</u>, or <u>isolation</u> of any <u>individual</u> as a condition of <u>licensure</u>, authorization, or the ability to continue to function as a <u>health care provider</u> in this state.
 - (2) **Health care providers from other jurisdictions.** To appoint and prescribe the duties of out-of-state emergency <u>health care providers</u> (with proof of current <u>licensure</u> in their state) as may be reasonable and necessary to respond to the <u>public health emergency</u>.

- (i) The appointment of out-of-state emergency <u>health care providers</u> shall not exceed the termination of the declaration of a state of <u>public health emergency</u>. The <u>state</u> or <u>local public health agency</u> may terminate the out-of-state appointments at any time or for any reason provided that any such termination will not jeopardize the health, safety, and welfare of the people of this state.
- (ii) The <u>state public health agency</u> may waive any or all <u>licensing</u> requirements, permits, or fees required by state code and applicable orders, rules, or regulations for <u>health care providers</u> from other jurisdictions to practice in this state.
- (iii) Any out-of-state emergency <u>health care provider</u> appointed pursuant to this Section shall not be held liable for any civil damages as a result of medical care or treatment related to the response to the <u>public health emergency</u> unless such damages result from providing, or failing to provide, medical care or treatment in the event of gross negligence or willful misconduct.
- (3) Personnel to perform duties of medical examiner or coroner. To authorize the state or local medical examiner or coroner to appoint and prescribe the duties of such emergency assistant medical examiners or coroners as may be required for the proper performance of the duties of the office.
 - (i) The appointment of emergency assistant medical examiners or coroners shall not exceed the termination of the declaration of a state of <u>public health emergency</u>. The medical examiner or coroner may terminate such emergency appointments at any time or for any reason, provided that any such termination will not impede the performance of the duties of the office.
 - (ii) The medical examiner or coroner may waive <u>licensing</u> requirements, permits, or fees required by state code and applicable orders, rules, or regulations for the performance of these duties.
- [e] Access to Mental Health Support Personnel. During and after the declaration of a state of <u>public health emergency</u>, the <u>state</u> or <u>local public health agency</u> shall provide <u>public information</u> about and referrals to <u>mental health support personnel</u> to address psychological responses concerning the <u>public health emergency</u>.

Section 6-105. Private Liability

- [a] During a state of <u>public health emergency</u>, any <u>person</u> owning or controlling real estate or other premises who voluntarily and without compensation permits the designation or use of the whole or any part of such real estate or premises for the purpose of sheltering <u>individuals</u>, together with that <u>person's</u> successors in interest, if any, shall not be civilly liable for negligently causing the death of, or injury to, any <u>individual</u> on or about such real estate or premises under permission, or for negligently causing loss of, or damage to, the property of such <u>person</u>.
- [b] During a state of <u>public health emergency</u>, any non-governmental <u>person</u> and employees and agents of such <u>person</u> in the performance of a contract with, and under the direction of, the state or its political subdivisions, or who renders assistance or advice at the request of the state or its political subdivisions under the provisions of this Article shall not be civilly liable for causing the death of, or injury to, any <u>individual</u> or damage to any property except in the event of gross negligence or willful misconduct.
- [c] The immunities provided in this Section shall not apply to any non-governmental <u>person</u>, or its employees and agents, whose act or omission caused in whole or part the <u>public health emergency</u> and who would otherwise be liable therefore.

Section 6-106. Compensation

- [a] **Just Compensation.** The State shall pay just compensation to the owner of any facilities or materials that are lawfully used or appropriated by a <u>state</u> or <u>local public health agency</u> for its temporary or permanent use during a state of <u>public health emergency</u> according to the procedures and standards set forth in this Article.
- [b] **Nuisances.** Compensation shall not be provided for facilities or materials that are closed, evacuated, decontaminated, or destroyed pursuant to § 6-103 when there is reasonable cause to believe that they may endanger the public's health.
- [c] **Actions.** Any action against the state with regard to the payment of compensation shall be brought in <u>court</u> in accordance with existing <u>court</u> laws and rules, or any such rules that may be developed by the <u>courts</u> for use during a state of <u>public health emergency</u>.
- [d] **Amount.** The amount of compensation shall be calculated in the same manner as compensation due for taking of property pursuant to [non-emergency eminent domain procedures], as provided in [State eminent domain laws], except that the amount of compensation calculated for items obtained under § 6-103[e] shall be limited to the costs incurred by the <u>person</u> to procure or produce the item.

ARTICLE VII PUBLIC HEALTH INFORMATION PRIVACY

Section 7-101. Acquisition of Identifiable Health Information

- [a] **In General.** <u>Identifiable health information</u> shall not be secretly <u>acquired</u> by a <u>state</u> or <u>local public health agency</u>. A <u>state</u> or <u>local public health agency</u> shall only <u>acquire identifiable health</u> information where:
 - (1) The <u>acquisition</u> relates directly to a <u>public health</u> purpose (including analysis and evaluation of <u>conditions of public health importance</u> and evaluation of <u>public health</u> programs);
 - (2) The <u>acquisition</u> is reasonably likely to achieve such purpose, taking into account the provisions of this Article and other governing laws, and the availability of resources or means to achieve such purpose; and
 - (3) The public health purpose cannot otherwise be achieved as well or better with <u>non-identifiable</u> health information.
- [b] **Notice Requirements.** Prior to implementation of a determination by a <u>state</u> or <u>local public</u> <u>health agency</u> to <u>acquire</u> or <u>store identifiable health information</u>, the agency shall announce its intentions to <u>acquire</u> or <u>store identifiable health information</u> and the purposes for which the information will be <u>used</u>. This announcement shall be made through public written notice distributed and posted in a manner as will reasonably inform members of the affected community.
 - (1) Such notice shall not identify any <u>individual</u> who is or may be the subject of <u>identifiable</u> health information.
 - (2) Where state or local law requires counseling services regarding a reportable disease, such counseling services shall include information that the disease is reportable to the <u>state</u> or <u>local public health agency</u> and a description of the purposes for which the <u>individual's</u> identifiable health information will be used by such agency.
- [c] Subsequent Acquisition of Identifiable Health Information. A state or local public health agency shall not acquire identifiable health information from another federal, tribal, state, or local public health agency unless the acquisition is consistent with the requirements of this Section.

Section 7-102. Use of Identifiable Health Information

- [a] **In General.** <u>Identifiable health information</u> shall be <u>used</u> by a <u>state</u> or <u>local public health</u> <u>agency</u> solely for public health purposes that are directly related to the purpose for which the information was <u>acquired</u>, including analysis and evaluation of conditions of public health importance and evaluation of public health programs.
- [b] **Scope of Uses.** Non-identifiable health information shall be used by a state or local public health agency whenever possible consistent with the accomplishment of public health purposes.
- [c] **Minimum Information.** Any <u>use of identifiable health information</u> permitted by this Article shall be limited to the minimum amount of information which the <u>public health agent</u> using the information reasonably believes is necessary to accomplish the public health purpose.
- [d] **Subsequent Uses.** A state or local public health agency may use identifiable health information for public health purposes that are not directly related to the purpose for which the information was acquired; provided that the agency meets the requirements of § 7-101[a] and [b] before using such information.
- [e] **Commercial Use.** <u>Identifiable health information</u> shall not be <u>used</u> by a <u>state</u> or <u>local public</u> <u>health agency</u> for commercial purposes.

- [f] Research Use. A state or <u>local public health agency</u> may <u>use identifiable health information</u> for <u>public health</u>, epidemiological, medical, or health services research provided that:
 - (1) It is not feasible to obtain the <u>written authorization</u> of the <u>individual</u> who is the subject of the information;
 - (2) Identifiable information is necessary for the effectiveness of the research project;
 - (3) The minimum amount of information necessary to conduct the research is <u>used</u>;
 - (4) The research utilizing the <u>identifiable health information</u> will likely contribute to achieving a public health purpose;
 - (5) The information is made non-identifiable at the earliest opportunity consistent with the purposes of the research project and <u>expunged</u> after the conclusion of the project; and
 - (6) Such <u>uses</u> are made pursuant to assurances of protections through the execution of a confidentiality agreement after review and approval of an <u>institutional review board</u>. The agreement shall require any <u>person</u> receiving such information to adhere to protections for the privacy and security of the information equivalent to or greater than such protections provided in this Article.
- [g] **Expunging Identifiable Health Information.** <u>Identifiable health information</u> whose <u>use</u> by a <u>state</u> or <u>local public health agency</u> no longer furthers the public health purpose for which it was <u>acquired</u> shall be <u>expunged</u> in a confidential manner.

Section 7-103. Disclosure of Identifiable Health Information

- [a] **Non-public Information.** <u>Identifiable health information</u> is not <u>public information</u>, and may not be <u>disclosed</u> without the <u>written authorization</u> of the <u>individual</u> (or <u>legal representative</u>) who is the subject of the information, except as provided in this Article.
- [b] Written Authorization. For the purposes of this Article, "written authorization" means a written statement authorizing the <u>disclosure</u> of <u>identifiable health information</u> on a form substantially similar to one promulgated by the <u>state public health agency</u> which is signed in writing or electronically by the <u>individual</u> who is the subject of the information. This authorization shall be dated and shall specify to whom the <u>disclosure</u> is authorized, the general purpose for such <u>disclosure</u>, and the time period in which the authorization for the <u>disclosure</u> is effective.
 - (1) An <u>individual</u> may revoke a <u>written authorization</u> in writing at any time. The <u>individual</u> is responsible for informing the <u>person</u> who originally received the authorization that it has been revoked.
 - (2) If the authorization does not contain an expiration date or has not previously been revoked, it automatically expires [six months] after the date it is signed.
 - (3) A general authorization for the <u>disclosure</u> of health-related information shall not be construed as <u>written authorization</u> pursuant to <u>written authorization</u> for the <u>disclosure</u> of <u>identifiable health information</u> unless such authorization also complies with this Section.
 - (4) When the <u>individual</u> is not competent or otherwise legally unable, <u>written authorization</u> may be provided by the <u>individual's legal representative</u>. For the purposes of this subsection, a minor under the age of [to be inserted consistent with state law] years is unable to give written authorization.
- [c] **Scope of Disclosures.** <u>Identifiable health information</u> shall be <u>disclosed</u> with the <u>written</u> <u>authorization</u> of the <u>individual</u> who is the subject of the information to any <u>person</u> and for any purpose for which the <u>disclosure</u> is authorized.
 - (1) <u>Disclosures</u> shall be limited to the minimum amount of information which the <u>person</u> making the <u>disclosure</u> reasonably believes is necessary to accomplish the purpose of the <u>disclosure</u>.

- (2) <u>Disclosures</u> shall be accompanied or followed by (in cases of oral <u>disclosures</u>, within [three days]) a statement in writing concerning the <u>public health agency's disclosure</u> policy, which shall include the following or substantially similar language: "This information has been <u>disclosed</u> to you from confidential public health records protected by state and federal law. Any further <u>disclosure</u> of this information in an identifiable form may be prohibited without the <u>written authorization</u> of the <u>individual</u> who is the subject of the information or as otherwise permitted by federal or state law. Unauthorized <u>disclosure</u> of this information may result in significant criminal or civil penalties."
- [d] **Disclosures without Written Authorization.** <u>Identifiable health information</u> may be <u>disclosed</u> without the <u>written authorization</u> of the <u>individual</u> who is the subject of the information where such disclosures are made:
 - (1) Directly to the individual;
 - (2) To appropriate federal agencies or authorities as required or authorized by federal or state law;
 - (3) To health care personnel to the extent necessary in a medical emergency or a state of <u>public</u> <u>health emergency</u> to protect the health or life of the <u>individual</u> who is the subject of the information from serious, imminent harm;
 - (4) To a <u>health oversight agency</u> to enable the agency to perform a health oversight function authorized by law if:
 - (i) The state or local public health agency itself is the focus of the oversight inquiry;
 - (ii) The <u>identifiable health information</u> is not removed from the premises, custody, or control of the <u>state</u> or <u>local public health agency</u>; and
 - (iii) The <u>health oversight agency</u> does not record the names or other identifying information of <u>individuals</u> who are the subjects of <u>identifiable health information</u>;
 - (5) To report information in a certificate of death, autopsy report, or related documents prepared under applicable laws or regulations; or
 - (6) To identify a deceased <u>individual</u> or the <u>individual</u>'s manner of death, or provide necessary information about a deceased <u>individual</u> who is a donor or prospective donor of an anatomical gift.
- [e] **Disclosures for Criminal or Civil Purposes.** No <u>identifiable health information</u> shall be <u>disclosed</u>, discoverable, or compelled to be produced pursuant to subpoena, compelled testimony of <u>public health agents</u> or other <u>persons</u> who have knowledge of such information subsequent to its <u>acquisition</u> by the <u>state</u> or <u>local public health agency</u>, in any civil, criminal, administrative, or other legal proceeding, except:
 - (1) A <u>state</u> or <u>local public health agency</u> may seek a <u>court</u> order granting the <u>disclosure</u> of <u>identifiable health information</u> upon an application showing a clear danger to an <u>individual</u> or the public's health that can only be averted or mitigated through a <u>disclosure</u> by the <u>state</u> or <u>local public health agency</u>.
 - (2) Upon receiving an application for an order authorizing <u>disclosure</u> pursuant to this Section, the <u>court</u> shall enter an order directing that all materials which are part of the application and decision of the <u>court</u> be sealed. Such materials shall not be made available to any <u>person</u> except to the extent necessary to conduct proceedings concerning the application, including any appeal. Such order shall further direct that all proceedings concerning the application be conducted *in camera*.
 - (3) Any <u>individual</u> about whom <u>identifiable health information</u> is sought and any <u>person</u> holding <u>identifiable health information</u> from whom <u>disclosure</u> is sought:

- (i) Shall be notified of an application for its disclosure pursuant to this Section; and
- (ii) May file a written response to the application, or appear for the limited purpose of providing evidence on the statutory criteria for the issuance of an order pursuant to this Section.
- (4) The <u>court</u> may grant an order without such notice or appearance where an application by a <u>state</u> or <u>local public health agency</u> or authorized <u>public health agent</u> requires immediate action to avert or mitigate a clear danger to the public's health. In assessing clear danger, the <u>court</u> shall provide written findings of fact and shall weigh the need for <u>disclosure</u> against individual privacy interests and any <u>public health</u> purpose which may be curtailed by <u>disclosure</u>.
- (5) An order authorizing <u>disclosure</u> of <u>identifiable health information</u> shall:
 - (i) Limit <u>disclosure</u> to that information which is necessary pursuant to the application;
 - (ii) Limit <u>disclosure</u> to those <u>persons</u> who need the information and specifically prohibit redisclosure to any other <u>persons</u>; and
 - (iii) Include any other measures that the <u>court</u> deems necessary to limit any <u>disclosures</u> not authorized by the order.
- [f] **Deceased Rights.** The rights of a deceased <u>individual</u> as provided by this Article may be exercised for a period of [two] years after the date of death by one of the <u>individuals</u> in the following order of priority, subject to any <u>written authorization</u> for another <u>person</u> to act by the decedent:
 - (1) an executor or administrator of the estate of a deceased <u>individual</u>, or one soon to be appointed in accordance with a will or other legal instrument;
 - (2) a surviving spouse or domestic partner;
 - (3) an adult child; or
 - (4) a parent.
- [g] **Secondary Disclosures.** No <u>person</u> to whom <u>identifiable health information</u> has been disclosed shall <u>disclose</u> the information to another <u>person</u> except as authorized by this Article. This subsection shall not apply to:
 - (1) The <u>individual</u> who is the subject of the information;
 - (2) The <u>individual's legal representative</u> where the <u>individual</u> is unable to give <u>written</u> <u>authorization</u> under § 7-103[b](4); or
 - (3) Any <u>person</u> who is specifically required by federal or state law to <u>disclose</u> the information.
- [h] **Record of Disclosures.** A <u>state</u> or <u>local public health agency</u> shall establish a written or electronic record of any of its <u>disclosures</u> of <u>identifiable health information</u> authorized by this Article. This record shall be treated as <u>identifiable health information</u> for the purposes of this Article. The record of <u>disclosures</u> shall include the following information:
 - (1) The name, title, address, and institutional affiliation, if any, of the <u>person</u> to whom <u>identifiable health information</u> is <u>disclosed</u>;
 - (2) The date and purpose of the <u>disclosure</u>;
 - (3) A brief description of the information disclosed; and
 - (4) The legal authority for the <u>disclosure</u>.

This record shall be maintained by the <u>state</u> or <u>local public health agency</u> for a period of ten years, even if the <u>identifiable health information disclosed</u> is no longer in the agency's possession.

Section 7-104. Security Safeguards

- [a] **Duty to Hold Information Secure.** State and local public health agencies have a duty to acquire, use, disclose, and store identifiable health information in a confidential manner that safeguards the security of the information.
- [b] Security Measures. State and local public health agencies and other persons who receive identifiable health information disclosed by any agency, other than the individual (or legal representative) who is the subject of the information, shall take appropriate measures to protect the security of such information, including:
 - (1) Maintaining such information in a physically secure environment, that:
 - (i) Minimizes the physical places in which such information is <u>used</u> or <u>stored</u>; and
 - (ii) Prohibits the <u>use</u> or <u>storage</u> of such information in places where the security of the information may likely be breached or is otherwise significantly threatened;
 - (2) Maintaining such information in a technologically secure environment;
 - (3) Limiting access to such information to those <u>persons</u> who have a demonstrable need to access such information;
 - (4) Reducing the length of time that such information is <u>used</u> or <u>stored</u> in a personally-identifiable form to that period of time which is necessary for the <u>use</u> of the information;
 - (5) Eliminating unnecessary physical or electronic transfers of such information;
 - (6) Expunging duplicate, unnecessary copies of such information;
 - (7) Developing and distributing written guidelines concerning the preservation of the security of such information;
 - (8) Assigning personal responsibility to <u>persons</u> who <u>acquire</u>, <u>use</u>, <u>disclose</u>, or <u>store</u> such information for preserving its security;
 - (9) Providing initial and periodic security training of all <u>persons</u> who <u>acquire</u>, <u>use</u>, <u>disclose</u>, or store such information;
 - (10) Thoroughly investigating any potential or actual breaches of security concerning such information;
 - (11) Imposing disciplinary sanctions for any breaches of security when appropriate; and
 - (12) Undertaking continuous review and assessment of security standards.
- [c] **Display of Written Protections.** Wherever identifiable health information is accessible by public health agents on the premises of a state or local public health agency, there shall be prominently displayed a notice in writing concerning the agency's disclosure policy, which shall include the following or substantially similar language: "Identifiable health information contains health-related information about individuals which may be highly-sensitive. This information is entitled to significant privacy protections under federal and state law. The disclosure of this information outside state and local public health agencies in an identifiable form is prohibited without the written consent of the individual who is the subject of the information, unless specifically permitted by federal or state law. Unauthorized disclosures of this information may result in significant criminal or civil penalties."
- [d] **Individuals on Agency Premises.** All <u>public health agents</u> or other <u>persons</u> having authority at any time to <u>acquire</u>, <u>use</u>, <u>disclose</u>, or <u>store identifiable health information</u> shall:
 - (1) Be informed of their personal responsibility for preserving the security of <u>identifiable health</u> information;
 - (2) Execute a <u>confidentiality statement</u> prior to entering the premises, or as soon thereafter as possible, pursuant to their review of written guidelines consistent with this Article concerning the preservation of the security of such information;

Please Note - Defined terms are <u>underlined</u> except in Article, Section, or subsection titles.

- (3) Fulfill their personal responsibility for preserving the security of <u>identifiable health</u> <u>information</u> to the degree possible; and
- (4) Report to the public health information officer any known security breaches or actions which may lead to security breaches. The identity of any <u>person</u> making a report under this subsection shall not be revealed, without the consent of the <u>person</u> making the report, to anyone other than investigating <u>public health officials</u> or law enforcement officers.
- [e] **Establishment of Public Health Information Officer.** State and local public health agencies shall appoint or designate a <u>public health agent</u> as the agency's public health information officer. This <u>individual</u> shall have overall responsibility for preserving the security of all <u>identifiable health information</u> and shall report directly to the <u>public health official</u> at the agency. Various duties of the public health information officer include:
 - (1) Monitoring the <u>acquisition</u>, <u>use</u>, <u>disclosure</u>, and <u>storage</u> of <u>identifiable health information</u> to ensure such activities are conducted in a physically and technologically secure environment;
 - (2) Developing and implementing written policies and guidelines to preserve the security of <u>identifiable health information</u>, including a model <u>confidentiality statement</u> pursuant to § 7-104[d](2);
 - (3) Coordinating the assignment of personal responsibility to each <u>person</u> who <u>acquires</u>, <u>uses</u>, <u>discloses</u>, or <u>stores</u> such information for preserving its security;
 - (4) Acting as the agency's principal investigator for each investigation of any security breach;
 - (5) Recommending disciplinary sanctions for any security breaches to the <u>public health official</u> at the agency who shall be responsible for issuing and implementing any sanctions;
 - (6) Coordinating with federal, state, or local authorities, where appropriate, in the investigation of any security breach; and
 - (7) Preparing any report required pursuant to § 7-103[f].
- [f] **Issuance of Public Reports.** State and local public health agencies shall prepare on an annual basis a report concerning the status of security protections of identifiable health information, which shall be distributed to the public health information officer for the state public health agency. The report shall be prepared in accordance with guidelines issued by the public health information officer for the state public health agency. The public health information officer for the state public health agency shall prepare a summary report on the status of security protections of identifiable health information for all state or local public health agencies within [ninety days] of the date in which reports required under this Section are requested. This report shall be issued to the [State legislature] with any recommendations for relevant state laws or amendments that may improve the security of identifiable health information.

Section 7-105. Fair Information Practices

- [a] Individual Access to Identifiable Health Information.
 - (1) **Definitions.** For the purposes of this Section, "<u>request</u>" means a written, dated, and signed correspondence in paper or electronic form through which the identity of the <u>individual</u> executing the correspondence can be verified. A "<u>requestor</u>" means any <u>individual</u> (or <u>legal representative</u>) who makes a <u>request</u>.
 - (2) **Opportunity to inspect.** Within fourteen days of the receipt of a <u>request</u> to review <u>identifiable health information</u>, a <u>state</u> or <u>local public health agency</u> shall provide the <u>requestor</u> an opportunity during regular business hours to inspect copies of such information in the possession of the <u>state</u> or <u>local public health agency</u> which concerns or relates to the requestor.

- (3) **Copies furnished.** Within ten days of the receipt of a <u>request</u> for copies of a <u>requestor's</u> <u>identifiable health information</u>, a <u>state</u> or <u>local public health agency</u> shall provide without charge copies of <u>identifiable health information</u> in the possession of the agency that the <u>requestor</u> is authorized to inspect.
- (4) **Explanations.** Upon request, the state or local public health agency shall provide an explanation of any code, abbreviation, notation, or other marks appearing in the identifiable health information. A state or local public health agency is not responsible for producing or reformulating identifiable health information, solely for the purposes of clarification, in other than its original form.
- [b] Limitations Concerning Individual Access to Identifiable Health Information.
 - (1) **Reasonable limitations.** Reasonable limitations may be placed on the time, place, and frequency of any inspection and copying <u>requests</u>. A <u>state</u> or <u>local public health agency</u> may ask to review the <u>identifiable health information</u> with the <u>requestor</u> upon inspection, although such review shall not be a prerequisite to providing the information.
 - (2) **Information related to other individuals.** Any information contained in the <u>identifiable</u> <u>health information</u> of the <u>requestor</u> that relates to the health status or other confidential information of other <u>individuals</u> shall be deleted for the purposes of inspection and copying.
 - (3) **Unrelated information.** Any information contained in the <u>identifiable health information</u> of the <u>requestor</u> that is not related to the <u>requestor</u>'s health status may be deleted for the purposes of inspection and copying.
 - (4) **Withholding information.** A <u>state</u> or <u>local public health agency</u> may deny a <u>requestor</u> the opportunity to inspect <u>identifiable health information</u> in the possession of the agency or may deny a <u>request</u> for copies of such information if:
 - (i) The agency can show via clear and convincing evidence that the review of the <u>identifiable health information</u> will cause substantial and identifiable harm to the requestor or others which outweighs the requestor's right to access the information;
 - (ii) A parent or legal guardian has requested access to <u>identifiable health information</u> concerning an <u>individual</u> over the age of [to be inserted consistent with State law] who is the subject of the information and the <u>individual</u> objects to such access of the information within seven days of receipt of written notice of the <u>request</u> by the <u>state</u> or <u>local public health agency</u> in possession of the information; or
 - (iii) The information is compiled principally in anticipation of, or for <u>use</u> in, a legal proceeding.
 - (5) **Request denials.** If a <u>state</u> or <u>local public health agency</u> denies a <u>request</u> to inspect or copy <u>identifiable health information</u>, it shall notify the <u>requestor</u> in writing of the reasons for denying such <u>request</u>, including that the agency does not possess any <u>identifiable health</u> information which is subject to the request.
 - (6) **Appeals.** A <u>requestor</u> may appeal such decisions under administrative review procedures as promulgated by the <u>state public health agency</u>.
- [c] **Accuracy of Information.** <u>State</u> and <u>local public health agencies</u> shall reasonably ensure the accuracy and completeness of <u>identifiable health information</u>.
 - (1) **Corrections.** After inspection or review of copies of <u>identifiable health information</u> pursuant to § 7-105[a], a <u>requestor</u> may <u>request</u> that the <u>state</u> or <u>local public health agency</u> correct, <u>amend</u>, or delete erroneous, incomplete, or false information.
 - (2) **Duty to correct.** The agency shall correct, <u>amend</u>, or delete erroneous, incomplete, or false information within fourteen days of a <u>request</u> provided that it determines that

- such modification is reasonably supported. The <u>requestor</u> has the burden of proving that information needs to be corrected, amended, or deleted.
- (3) **Written notification.** The <u>requestor</u> shall be notified in writing by the agency of any corrections, <u>amendments</u>, or deletions made, or, in the alternative, the reasons for denying any request in whole or part.
- (4) **Appeals.** A <u>requestor</u> may appeal any decision of an agency denying a <u>request</u> to correct, <u>amend</u>, or delete erroneous, incomplete, or false information under administrative review procedures as promulgated by the <u>state public health agency</u>.
- (5) **Retention of statement.** A brief, written statement from the <u>requestor</u> challenging the veracity of the <u>identifiable health information</u> shall be retained by the <u>state</u> or <u>local public health agency</u> for as long as the information is possessed. The agency shall make a notation of the disputed entries in the <u>requestor's identifiable health information</u>, including the original language and the <u>requestor's proposed change</u>. This statement shall be provided to any person who is authorized to receive the identifiable health information.
- (6) **Subsequent notifications.** A <u>state</u> or <u>local public health agency</u> shall take reasonable steps to notify all <u>persons</u> indicated by the <u>requestor</u>, or others for whom known <u>acquisitions</u> or <u>disclosures</u> have previously been made, of corrections, <u>amendments</u>, or deletions made to identifiable health information.
- [d] **Appeals.** In the event that administrative appeals have been exhausted pursuant to § 7-105[b or c], the <u>requestor</u> may appeal decisions of the <u>state</u> or <u>local public health agency</u> in <u>court</u>. The <u>court</u> shall determine whether there exists a reasonable basis for the action or decision of the agency pursuant to an *in camera* review of the relevant <u>identifiable health information</u>, the administrative record, and other admissible evidence. Individual relief is limited to a judgment requiring the agency to make available the requested information to the <u>requestor</u> for inspection or copying or to correct, <u>amend</u>, or delete erroneous, incomplete, or false information.

ARTICLE VIII ADMINISTRATIVE PROCEDURES, CIVIL AND CRIMINAL ENFORCEMENT, AND IMMUNITIES

Section 8-101. Administrative Rulemaking

The <u>state</u> or <u>local public health agency</u> and other affected agencies are authorized to promulgate and implement such rules and regulations as are reasonable and necessary to implement and effectuate the provisions of this <u>Act</u>. The <u>state</u> or <u>local public health agency</u> and other affected agencies shall have the power to enforce the provisions of this <u>Act</u> through the issuance of orders and such other remedies as are provided by law. This Section does not limit specific enforcement powers enumerated in this Act.

Section 8-102. Applicability of State Administrative Procedure Act

Any applicable action of a <u>state</u> or <u>local public health agency</u> made pursuant to this <u>Act</u>, including rendering adjudications, issuing orders, and declaring regulations, shall be governed by the [*State's Administrative Procedure Act (APA)*], or other applicable laws, unless such procedures interfere with the adoption of any rule required by federal law in which the <u>state</u> or <u>local public health agency</u> is precluded by law from exercising any discretion. <u>Courts</u> may review final agency actions in accordance with the APA, and may stay or permanently enjoin any such action that fails to comport with the requirements of the <u>Act</u>.

Section 8-103. Procedural Due Process

- [a] **Notices.** In every case of formal or informal administrative adjudication, unless otherwise specified in this <u>Act</u>, all <u>persons</u> shall be afforded an opportunity for hearing after reasonable notice. Notice must be given to all parties at least [10 days] before a scheduled hearing. The notice shall include:
 - (1) A statement of the time, place, and nature of the hearing;
 - (2) A statement of the legal authority and jurisdiction under which the hearing is to be held; and
 - (3) A short and plain statement of the matters of fact and law asserted.
 - [b] **Individual Rights.** All <u>persons</u> subject to formal administrative adjudications shall be entitled to:
 - (1) Representation by legal counsel;
 - (2) Submit oral and documentary evidence and rebuttal proofs;
 - (3) Conduct cross-examination to elicit a full and fair disclosure of the facts; and
 - (4) A timely completion of the proceedings.
- [c] **Subpoenas and Witnesses.** The <u>state</u> or <u>local public health agency</u> may (and on request of any party to a case shall) issue subpoenas requiring testimony or the production of physical or other evidence.
 - (1) Any <u>person</u> who is subpoenaed and who objects may ask the agency to quash or modify the subpoena as illegally or improvidently granted. If the agency refuses, the <u>person</u> may immediately procure by petition a decision on the validity thereof in a court.
 - (2) The agency may procure an order of enforcement from a court.
 - (3) Depositions and requests for admissions may be directed, issued, and taken on order of the agency for good cause shown. These orders or authorizations may be challenged or enforced in the same manner as subpoenas. This subsection does not authorize discovery proceedings.
- [d] **Record of Proceedings.** The evidence of any hearing shall be recorded and kept by the <u>state</u> or <u>local public health agency</u> as public records subject to judicial notice. The full record or file in every case shall be made available for public inspection consistent with the [State's Freedom of Information Act].

[e] **Appeals.** Any <u>person</u> adversely affected by a decision of a <u>state</u> or <u>local public health agency</u> shall have a right to appeal the decision through an appropriate and timely <u>court</u> action against the agency and/or its agents, consistent with the [*State's Administrative Procedure Act (APA)*], or other applicable laws.

Section 8-104. Criminal Penalties

- [a] **Violations by Public Health Agents.** Any <u>public health agent</u> who willfully violates or obstructs the execution of any provision, regulation, or rule, or order under this <u>Act</u>, for which no other penalty is prescribed, shall be guilty of a misdemeanor. Upon conviction, the agent is punishable by a fine not to exceed [\$1,000] or imprisonment for a period not to exceed [one] year, or both.
- [b] **Violations in General.** Any <u>person</u>, other than a <u>public health agent</u>, who willfully violates or obstructs the execution of any provisions, regulation, or rule, or fails to follow any <u>court</u> order under this <u>Act</u>, for which no other penalty is prescribed, shall be guilty of a misdemeanor. Upon conviction, the official is punishable by a fine not to exceed [\$1,000] or imprisonment for a period not to exceed [one] year, or both.
- [c] **Enhanced Penalties.** The maximum penalties described in subsections [a-b] shall be doubled for every subsequent conviction of any <u>person</u> arising out of a violation or violations related to a set of circumstances that are different from those involved in the previous violation or set of related violations.
- [d] **Statute of Limitations.** Any action under this Section is barred unless the action is commenced within [*three*] years after the cause of action accrues.
 - [e] **Separate Offense.** Each violation of this <u>Act</u> is a separate and actionable offense.

Section 8-105. Civil Remedies

- [a] **In General.** Any <u>person</u> aggrieved by any violation of this <u>Act</u> may maintain an action for relief as provided in this Section.
- [b] **Appropriate Relief.** The <u>court</u> may order a <u>state</u> or <u>local public health agency</u>, <u>public health agent</u>, or other <u>persons</u> to comply with this <u>Act</u> and may order any other appropriate civil or equitable relief, including an injunction to prevent non-compliance.
- [c] **Compensatory Damages.** If the <u>court</u> determines that there is a violation of this <u>Act</u>, the aggrieved <u>person</u> is entitled to recover damages for losses sustained as a result of the violation. The measure of damages shall be the greater of the aggrieved <u>person</u>'s actual damages, or liquidated damages of [\$1,000] for each violation, provided that liquidated damages shall not exceed [\$10,000] for any particular claim.
- [d] **Punitive Damages.** If the <u>court</u> determines that there is a violation of this <u>Act</u> which results from willful or grossly negligent conduct, the aggrieved <u>person</u> may recover punitive damages not to exceed [\$10,000], exclusive of any other loss, for each violation from the offending party.
- [e] **Attorney Fees.** If the aggrieved <u>person</u> prevails, the <u>court</u> may assess reasonable attorney's fees and all other expenses reasonably incurred in the litigation against the non-prevailing parties.
- [f] **Joint and Several Liability.** Responsible parties are jointly and severally liable (where applicable under existing state law) for any compensatory damages, attorney's fees, or other costs awarded.
- [g] **Statute of Limitations.** Any action under this Section is barred unless the action is commenced within [*one*] year after the cause of action accrues or was or should reasonably have been discovered by the aggrieved <u>person</u> (or <u>legal representative</u>).
 - [h] **Separate Offense.** Each violation of this <u>Act</u> is a separate and actionable offense.
- [i] **Pre-existing Remedies.** Nothing in this Section limits or expands the right of an aggrieved person (or legal representative) to recover damages under any other applicable law.

Section 8-106. Civil Enforcement

The [State Attorney General] or other appropriate State or local law enforcement official may maintain a civil action to enforce compliance with or violations of this Act. Relief may be ordered by the court as authorized in § 8-104 and § 8-105 of this Act.

Section 8-107. Immunities

- [a] **State Immunity.** Neither the state, its political subdivisions, nor, except in cases of gross negligence or willful misconduct, the Governor, a <u>state</u> or <u>local public health agency</u>, or any other state or local agent referenced in this Article, is liable for the death of or any injury to <u>individuals</u>, or damage to property, as a result of complying with or attempting to comply with this <u>Act</u> or any rule or regulations promulgated pursuant thereto. Furthermore, nothing in this <u>Act</u> shall be construed to impose liability on a <u>state</u> or <u>local public health agency</u> for the acts or omissions of a <u>private sector partner</u> unless explicitly authorized by law.
- [b] **Supervisory Officers.** No <u>public health agent</u> who is a superior or supervisory officer over a <u>public health agent</u> who violates any part of this <u>Act</u> shall be subject to civil remedies under this <u>Act</u> on the theory of vicarious liability (absent the officer's gross negligence), provided the superior or supervisory official:
 - (1) Had no prior actual or constructive knowledge of the violation or actions leading to the violation; and
 - (2) Was not otherwise directly responsible for ensuring against the occurrence of the violation.

ARTICLE IX MISCELLANEOUS PROVISIONS

Section 9-101. Titles

This <u>Act</u> may be cited as the Turning Point Model State Public Health Act. For the purposes of this <u>Act</u>, titles and subtitles of Articles, Sections, and subsections are instructive, but not binding.

Section 9-102. Uniformity Provision

This <u>Act</u> shall be applied and construed to effectuate its general purpose to make uniform the law with respect to the subject of this <u>Act</u> among states enacting it.

Section 9-103. Severability

The provisions of this <u>Act</u> are severable. If any provision of this <u>Act</u> or its application to any <u>person</u> or circumstances is held invalid in a federal or State <u>court</u>, the invalidity does not affect other provisions or applications of this <u>Act</u> which can be given effect without the invalid provision or application.

Section 9-104. Repeals

The following acts, laws, or parts thereof, are explicitly repealed with the passage of this Act:

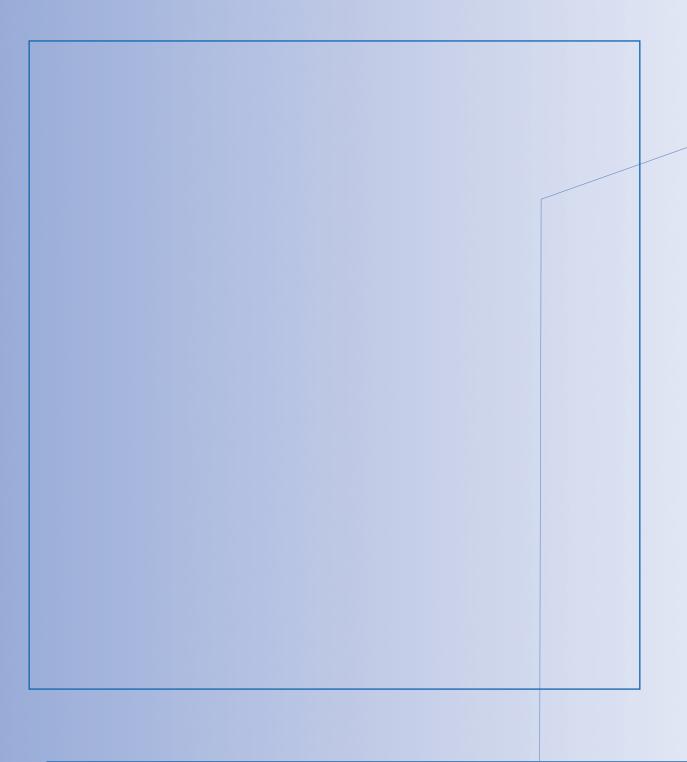

- [a] [To be inserted in each state considering passage of the <u>Act</u>]
- [b] [*To be inserted in each state considering passage of the* <u>Act</u>]
- [c] [To be inserted in each state considering passage of the <u>Act</u>] . . .

Section 9-105. Conflicting Laws

- [a] **Federal Supremacy.** This <u>Act</u> does not restrict any <u>person</u> from complying with federal law or regulations.
- [b] **Prior Conflicting Acts.** In the event of a conflict between this <u>Act</u> and other state or local laws or regulations, or administrative procedures pursuant to the [*State Administrative Procedure Act*], the provisions of this <u>Act</u> apply.

Section 9-106. Reports and Effective Date

- [a] **Initial Reports.** No later than [six] months after the date of enactment, the <u>public health official</u> at each <u>state</u> or <u>local public health agency</u> shall prepare and submit a report to the <u>state public health agency</u> concerning the impact and effect of this <u>Act</u> on each agency.
- [b] **Comprehensive Report.** No later than [nine] months after the date of enactment, the <u>state public health agency</u> shall issue a comprehensive report to the [State legislature] on behalf of each <u>public health agency</u> concerning the effect of this <u>Act</u>, including any recommendations for legislative amendments.
- [c] **Effective Date.** The provisions of this <u>Act</u> shall be effective [*one year*] after the date of its enactment
